Organises

Panel Discussion on Role of Women Scientists for Weather and Climate Services in India

24th Oct. 2021, 11:00 AM-01:00 PM

Women have started assuming greater roles in leadership positions and become integral part of decision-making processes. This can have a significant impact in shaping the future for the new India. There is a need to bring on board women from all walks of life for programme pertaining to weather and climate services, agriculture, health, disaster risk reduction and water. Awareness and provision of appropriate opportunities for rural women in the S&T sector through entrepreneurship and utilization of ICT can become effective game changers.
