#### **Agromet advisories for likely impact of Heavy Rainfall**

- In **Jammu & Kashmir**, keep the harvested mustard, lentil and gram in safe places. Drain out excess rainwater from the standing crops. Provide staking to the pea vines for better crop stand against strong winds.
- In **Arunachal Pradesh**, postpone fresh sowing of summer Jhum rice, maize and vegetables. Harvest cabbage, pea, mustard, late-maturing paddy varieties & potatoes carefully and shift the harvested produce to safe places. Maintain proper drainage channels in the fields of rice, maize, other standing crops, vegetables and orchards.
- In **Assam**, maintain proper drainage channels in the crop fields. Undertake sowing of black gram, okra ladyfinger and Olitorius jute as well as planting of banana, turmeric and ginger at optimum soil moisture conditions.
- In **Meghalaya**, ensure proper drainage in summer vegetable crops. Carry out staking and propping of plantation crops and cover the young vegetable seedlings. Carry out sowing of vegetables like carrot, okra, capsicum, etc., during clear weather.
- In **Kerala**, provide mechanical support to banana plants and staking to vegetables. Drain out excess rainwater from the standing crops.
- In **Tamil Nadu**, provide mechanical support for banana crops to prevent lodging. Undertake basin preparation for pepper, clove, nutmeg and cinnamon for better rain water harvest. Avoid pesticide and insecticide application during the period of moderate / heavy rainfall.

#### **Agromet advisories for likely impact of Thunderstorm / Gusty Winds**

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops properly and cover them to minimise the risk of displacement due to strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

#### **Livestock / Poultry**

- Keep the animals inside the shed during heavy rainfall / hailstorm and provide them balanced feed.

- Store feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain out excess water, thereby preventing fish from escaping in case of overflow.
