- ❖ **Heavy to very heavy rainfall with extremely heavy rainfall likely at isolated places over Chhattisgarh on 05<sup>th</sup> & 06<sup>th</sup> July; Odisha on 05<sup>th</sup> July; Konkan & Goa, Gujarat Region during 05<sup>th</sup> -07<sup>th</sup>; Madhya Maharashtra on 05<sup>th</sup> & 06<sup>th</sup>; Saurashtra & Kutch on 05<sup>th</sup> July.**

### **Impact Expected**

- Localized Flooding of roads, water logging in low lying areas and closure of underpasses mainly in urban areas.
- Occasional reduction in visibility due to heavy rainfall.
- Disruption of traffic in major cities due to water logging in roads leading to increased travel time.
- Minor damage to kutcha roads.
- Possibilities of damage to vulnerable structure.
- Localized Landslides/Mudslides/landslips/mudslips/landsinks/mudsinks.
- Damage to horticulture and standing crops in some areas due to inundation.
- It may lead to riverine flooding in some river catchments (for riverine flooding please visit Web page of CWC)

### **Action Suggested**

- Check for traffic congestion on your route before leaving for your destination.
- Follow any traffic advisories that are issued in this regard.
- Avoid going to areas that face the water logging problems often.
- Avoid staying in vulnerable structure.

### Agromet advisories for likely impact of Heavy Rainfall

- In **Sub Himalayan West Bengal**, protect rice nursery beds with straw mulch, dry grass, or temporary polythene / agro-net covers to prevent seed washing, poor germination and seedling loss. Drain out excess water from jute, ginger, chilli, tomato and dalley khorsani fields and nurseries of *kharif* rice, finger millet and vegetables.
- In **Gangetic West Bengal**, harvest mature sesame pods promptly and keep the harvested produce in safer place. Arrange proper drainage in vegetables, ginger and turmeric fields and betel vine gardens to avoid waterlogging.
- In **Odisha**, postpone transplanting of rice seedlings and sowing of *kharif* crops till cessation of heavy rainfall. Drain out excess rain water from rice and vegetable nurseries and fields of rice, maize, cotton, millets, vegetables and pulse crops and fruit orchards to prevent waterlogging.
- In **Jharkhand**, construct channels around the rice nursery bed to maintain proper drainage.
- In **Bihar**, harvest the mature pods of summer green gram and keep harvested produce in safer places. Provide adequate drainage facilities in rice nurseries and maize fields.
- In **Madhya Pradesh**, harvest mature green gram, vegetables and fruits and store the produce in safe place. Postpone sowing of soybean. Maintain effective drainage channels in rice and vegetable nurseries and fields of ginger and turmeric during heavy rainfall to avoid water stagnation.
- In **Chhattisgarh**, ensure proper drainage in nurseries of rice and vegetables.
- In **Gujarat**, postpone sowing and transplanting of *kharif* crops until rainfall intensity decreases and fields conditions become favourable. Delay transplanting of rice in submerged fields until excess water recedes. Provide adequate drainage in nurseries to prevent seedling damage and waterlogging. Drain out excess water from rice nursery; fields of sugarcane, okra, vegetables, yam and sapota orchards.
- In **Konkan**, postpone nursery sowing of rice, finger millet and vegetables; sowing of groundnut and cucurbitaceous vegetables and planting of new orchards like mango, coconut, cashewnut and arecanut. Drain out excess water from nurseries of rice and finger millet and fields of rice and vegetables.
- In *ghat* areas of **Madhya Maharashtra**, drain out excess water from nurseries of rice, finger millet and vegetables.
- In **Vidarbha**, ensure proper drainage in vegetable nurseries and fruit orchards.
- In **Keralam**, provide adequate drainage facilities in banana, coconut, cardamom, ginger, black pepper and vegetables. Provide staking support in banana plants and strengthen the pandals of vegetable crops. Avoid transplanting of rice during heavy rain.
- In **Coastal Karnataka**, ensure proper drainage in rice seedbeds, rice fields and fruit orchards to prevent water stagnation. Avoid transplanting of rice during spells of heavy rains.
- In **South Interior Karnataka**, provide proper drainage in arecanut and coconut fields.
- In **Himachal Pradesh**, maintain proper drainage channels in fields of maize, finger millet and vegetables **to prevent waterlogging**. Delay sowing of rajma until the weather becomes clear.
- In **Uttarakhand**, postpone sowing of maize and soybean. Ensure proper drainage in fields of rice, maize, tomato, chilli, barnyard millet and finger millet to drain out excess rain water from the field.
- In **East Rajasthan**, postpone irrigation in summer crops. Make arrangements for draining out excess water from rice nurseries and fields of groundnut, green gram and cotton.
- In **Arunachal Pradesh**, maintain drainage channels in fields of rice, maize, soybean, finger millet and vegetables.
- In **Assam**, make provision for draining out excess water from rice nurseries, soybean, jute, ginger, turmeric, vegetables, banana, citrus and papaya. Provide mechanical support to the sugarcane crop to prevent lodging.
- In **Meghalaya**, ensure proper drainage channels in rice nurseries, maize, ginger, cowpea, vegetable fields and banana plantations. Protect young seedlings from direct exposure to heavy rainfall. Use propping (bamboo or wooden poles) to support heavily laden plants.
- In **Tripura**, ensure adequate drainage arrangements to remove excess water from rice and vegetable fields during heavy rainfall.

### Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

## Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- In regions with high temperatures and heat wave conditions, provide clean, cool drinking water to animals, and cover the roofs of poultry sheds with grass to reduce the adverse effects of heat.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
