- Unplug electrical/ electronic appliances.
- Immediately get out of water bodies.
- Keep away from all the objects that conduct electricity.

### **Impact Expected & Action Suggested due to heavy/very heavy rainfall over**

- ❖ **Isolated heavy rainfall** likely over Arunachal Pradesh on 8th June; Nagaland, Manipur, Mizoram & Tripura during 8th-14th June with isolated **very heavy rainfall** also likely over Arunachal Pradesh during 9th-14th June; Assam & Meghalaya during 8th-14<sup>th</sup>; Konkan & Goa and Madhya Maharashtra during 8th-9<sup>th</sup>; Tamil Nadu, Puducherry & Karaikal during 8th-11th June; Kerala & Mahe during 9th-12th June; Lakshadweep and Rayalaseema during 8th-9th June; Coastal Karnataka during 8th-9th June and during 12th-14th June; North Interior Karnataka during 12th-13th June; South Interior Karnataka on 9th June and during 11th-14th June; Telangana during 8th-10th June with isolated **very heavy rainfall** also likely over Coastal Andhra Pradesh & Yanam and Kerala & Mahe on 8th June; Coastal Karnataka during 10th-11th June; North Interior Karnataka during 8th-11th June; South Interior Karnataka on 8th June and on 10th June. Isolated **heavy rainfall** likely over Sub-Himalayan West Bengal & Sikkim during 10th-13th June; Bihar during 10th-12th June; Odisha during 11th-12th June with isolated **very heavy rainfall** also likely over Sub-Himalayan West Bengal & Sikkim during 8th-9th June.

### Impact Expected

- Localized Flooding of roads, water logging in low lying areas and closure of underpasses mainly in urban areas.
- Occasional reduction in visibility due to heavy rainfall.
- Disruption of traffic in major cities due to water logging in roads leading to increased travel time.
- Minor damage to kutch roads.
- Possibilities of damage to vulnerable structure.
- Localized Landslides/Mudslides/landslips/mudslips/landsinks/mudsinks.
- Damage to horticulture and standing crops in some areas due to inundation.
- It may lead to riverine flooding in some river catchments (for riverine flooding please visit Web page of CWC)

### Action Suggested

- Check for traffic congestion on your route before leaving for your destination.
- Follow any traffic advisories that are issued in this regard.
- Avoid going to areas that face the water logging problems often.
- Avoid staying in vulnerable structure.

### Impact expected and action suggested due to Heat wave conditions:

- ❖ **Heat wave** conditions very likely in isolated pockets over East Madhya Pradesh during 10th-11th June; East Uttar Pradesh during 9th-10th June; Haryana Chandigarh & Delhi during 8th-11th June; Himachal Pradesh during 9th-10th June; Jammu-Kashmir-Ladakh-Gilgit-Baltistan-Muzaffarabad during 9th-10th June; Punjab during 8th-11th June; Vidarbha during 8th-10th June; West Madhya Pradesh during 10th-11th June; West Rajasthan during 8th-11th June; West Uttar Pradesh during 9th-11th June.

### Alert Areas

- High temperature & increased likelihood of heat illness symptoms in people who are either exposed to sun for a prolonged period or doing heavy work.
- High health concern for vulnerable people e.g. infants, elderly, people with chronic diseases.
- Avoid heat exposure- keep cool. Avoid dehydration.
- Drink sufficient water- even if not thirsty.
- Use ORS, homemade drinks like lassi, torani (rice water), lemon water, buttermilk, etc. to keep yourself hydrated.

### Agromet advisories for likely impact of Heavy Rainfall

- In **Keralam**, drain out excess water from banana, coconut, cardamom, ginger, black pepper and vegetable fields. Provide support in banana and strengthen the pandals of vegetables.
- In **Tamil Nadu**, maintain proper drainage in rice, cumbu-sown areas and groundnut, sugarcane, banana and vegetable fields. Keep the harvested produce at safe places.
- In **Lakshadweep**, provide adequate drainage in standing crop fields to prevent waterlogging.
- In **Karnataka**, ensure proper drainage in paddy fields, areca nut groves, mango orchards and other standing crops. Keep the harvested produce in safe places. Provide staking to tomato plants. In **Coastal Karnataka**, postpone nursery seed sowing for paddy and other agricultural activities in standing crops.
- In **Sub Himalayan West Bengal**, In Hill Zone, ensure proper drainage in terraced fields and vegetable plots. In Terai Zone, harvest rice crop and vegetables as soon as possible and store in safe place.
- In **Arunachal Pradesh**, ensure proper drainage in vegetables, maize, rice nursery and other crop fields to prevent waterlogging. Immediately drain excess water from paddy nurseries after heavy showers to prevent seedling damage. Avoid transplanting during heavy rainfall. Cover newly sown nursery beds with polythene sheets or straw mulch.
- In **Assam**, ensure proper drainage arrangements for quick removal of excess water from rice nurseries, jute, ginger, vegetables, banana, citrus and papaya fields. Postpone nursery sowing of *Sali* rice. Cover the rice nursery beds with thin polythene sheet.
- In **Tripura**, harvest Boro rice and immediately transfer the grains to a safer place to protect from the rain.

- In **Maharashtra**, undertake harvesting vegetables and fruits and keep the harvested produce at safer places. Provide mechanical support to orchards and staking in vegetables.

#### **Agromet advisories for likely impact of High temperatures/ Heat Waves**

- In **Punjab**, apply light and frequent irrigation to standing crops, fruit plants and vegetable crops.
- In **Haryana**, apply regular need based irrigation to the rice nursery to protect from the high temperature. Provide light and frequent irrigation to standing crops, fruit plants and vegetable crops.
- In **West Rajasthan**, provide light irrigation to maintain adequate moisture in standing crops and vegetables.
- In **Vidarbha**, provide light irrigation to maintain adequate moisture in standing crops and vegetables.

#### **Agromet advisories for likely impact of Thunderstorm / Gusty Winds**

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

#### **Livestock / Poultry / Fisheries**

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- In regions with high temperatures and heat wave conditions, provide clean, cool drinking water to animals, and cover the roofs of poultry sheds with grass to reduce the adverse effects of heat.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
