Agromet advisories for likely impact of Heavy Rainfall

- In **Jammu & Kashmir**, drain excess water from the fields after rainfall. Harvest matured crops and postpone irrigation, intercultural operations, and application of plant protection measures and fertilizers to standing crops. Provide adequate drainage in standing crop fields to avoid waterlogging.
- In **Himachal Pradesh**, provide adequate drainage in standing crop fields to avoid waterlogging. Prepare drainage channels in pea fields. Avoid irrigation as the rice crop approaches maturity. Provide mechanical support to plantations and staking to young plants and vegetables.
- In **Haryana and Punjab**, withhold irrigation in standing crops, make necessary arrangements to remove excess rain water from the crop fields. Under the prevailing weather conditions, termite infestation may occur in crops and vegetables, apply Chlorpyrifos 20 EC @ 4ml/litre of water along with irrigation water.
- In **Uttarakhand**, Avoid irrigation to pigeon pea, radish, carrot and beetroot crops in view of the forecast of rainfall. Postpone sowing of spinach and fenugreek and store the harvested produce in a safe place.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
