Press Release
Date: 17th November 2026
Time of Issue:1325 hours IST

Subject:(i) The Cyclonic Storm "Akvan" [Pronunciation: Akvan] over the central parts of south & adjoining westcentral Bay of Bengal is very likely to intensify into a Severe Cyclonic Storm over westcentral Bay of Bengal around evening of today, the 17th November, 2026. Thereafter, it is likely to intensify further into a Very Severe Cyclonic Storm around 19th November morning.
(ii) Under the influence of above system heavy to very heavy rainfall at a few places with isolated extremely heavy rainfall likely over Coastal Andhra Pradesh & Yanam during 19th-20th November and isolated heavy to very heavy rainfall likely over Telangana on 20th& 21st November.

Realized weather during past 24 hours ending at 0830 hours IST of today, the 17th November, 2026:

- **Dense to very dense fog (visibility < 50 m)** reported in isolated pockets of West Uttar Pradesh and **Dense fog (visibility < 200 m)** in isolated pockets of Odisha, Sub-Himalayan West Bengal & Sikkim.
- **Visibility reported (< 200 meters): Odisha:** Rourkela (dist Sundargarh) 50.0; **West Uttar Pradesh:** Bareilly (dist Bareilly) 00.

Weather Systems, Forecast and Warnings (Annexure I & II):

- Yesterday's **Deep Depression** over Southeast & adjoining Southwest Bay of Bengal intensified into a **Cyclonic Storm "Akvan" [Pronunciation: Akvan]** over the central parts of south & adjoining westcentral Bay of Bengal at 1730 hours IST of 16th November. It moved slowly north-northwestwards and lay centered over the same region at 0830 hours IST of today, the 17th November, 2026. It is very likely to move slowly north-northwestwards and intensify further into a **Severe Cyclonic Storm** over westcentral Bay of Bengal around evening of today, the 17th November, 2026. Thereafter, it is likely to move northwestwards and intensify further into a **Very Severe Cyclonic Storm** around 19th November morning. Continuing to move northwestwards, it is likely to cross Andhra Pradesh & Yanam coasts between Nellore and Tuni, around noon of 20th November, 2026 as a **Very Severe Cyclonic Storm** with the maximum sustained wind speed of 120-130 kmph gusting to 145 kmph.
- The **upper air cyclonic circulation** over Northeast Assam & neighbourhood in lower tropospheric levels.
- The **upper air cyclonic circulation** over Sikkim & neighbourhood in lower tropospheric level.

Under the influence of above systems, the following weather is likely:

South Peninsular India:

- **Isolated to Scattered** rainfall likely over Kerala & Mahe and Tamil Nadu, Puducherry & Karaikal during 17th-23rd November; Lakshadweep during 22nd-23rd November; Coastal Karnataka, North Interior Karnataka and South Interior Karnataka during 21st-23rd November; Coastal Andhra Pradesh & Yanam on 18th November and during 22nd-23rd November; Rayalaseema during 18th-19th November and during 21st-23rd November; Telangana on 19th November and during 22nd-23rd November.
- **Fairly Widespread to Widespread** rainfall likely over Coastal Andhra Pradesh & Yanam during 19th-21st November; Rayalaseema on 20th November; Telangana during 20th-21st November.
- Isolated thunderstorm, lightning & gusty winds (speed reaching 80-90 kmph) likely over Coastal Andhra Pradesh & Yanam during 19th-20th November, with gusty winds (speed reaching 40-50 kmph gusting to 60 kmph) likely over Tamil Nadu, Puducherry & Karaikal during 18th-20th November; Coastal Andhra Pradesh & Yanam on 21st November; Rayalaseema during 18th-21st November.
- Isolated **heavy rainfall** likely over Tamil Nadu, Puducherry & Karaikal on 19th November; Coastal Andhra Pradesh & Yanam on 18th November and on 21st November; Rayalaseema during 19th-20th November with isolated **very heavy rainfall** also likely over Telangana during 20th-21st November.
- **Heavy to very heavy rainfall at a few places with isolated extremely heavy rainfall likely over Coastal Andhra Pradesh & Yanam during 19th-20th November.**

- **Thundersquall (wind speed reaching 60-70 kmph gusting to 80 kmph) likely over Coastal Andhra Pradesh & Yanam on 18th November with thundersquall (wind speed reaching 100-110 kmph gusting to 120 kmph) on 19th & 20th November.**

Central India:

- **Isolated to Scattered** rainfall likely over West Madhya Pradesh during 21st-22nd November; East Madhya Pradesh during 20th-23rd November; Vidarbha during 20th-22nd November; Chhattisgarh during 18th-19th November and during 22nd-23rd November.
- **Fairly Widespread to Widespread** rainfall likely over Chhattisgarh during 20th-21st November.
- Isolated **thunderstorm, lightning & gusty winds (speed reaching 40-50 kmph gusting to 60 kmph)** likely over East Madhya Pradesh and Vidarbha on 21st November; Chhattisgarh during 20th-21st November.
- Isolated **heavy rainfall** likely over East Madhya Pradesh and Vidarbha on 21st November; Chhattisgarh during 20th-21st November.

East India:

- **Fairly Widespread to Widespread** rainfall likely over Andaman & Nicobar Islands during 17th-18th November; Gangetic West Bengal and Odisha during 19th-21st November; Jharkhand during 20th-21st November.
- **Isolated to Scattered** rainfall likely over Andaman & Nicobar Islands during 19th-23rd November; Sub-Himalayan West Bengal & Sikkim on 17th November; Gangetic West Bengal and Odisha on 18th November and during 22nd-23rd November; Jharkhand on 19th November and during 22nd-23rd November; Bihar on 21st November.
- Isolated **thunderstorm, lightning & gusty winds (speed reaching 40-50 kmph gusting to 60 kmph)** likely over Odisha on 18th November, **with gusty winds (speed reaching 30-40 kmph gusting to 50 kmph)** likely over Andaman & Nicobar Islands during 17th-20th November; Gangetic West Bengal during 19th-21st November.
- Isolated **heavy rainfall** likely over Gangetic West Bengal during 19th-21st November; Jharkhand during 20th-21st November; Odisha on 18th November with isolated **very heavy rainfall** also likely over Odisha during 19th-21st November.
- **Thundersquall (wind speed reaching 50-60 kmph gusting to 70 kmph)** likely over Odisha during 19th-21st November.

West & Northeast India:

- **No significant weather likely over West & Northeast India during the week**.

Fog warning:

- **Dense fog conditions** very likely over East Uttar Pradesh and West Uttar Pradesh during 17th-18th November; Haryana Chandigarh & Delhi and Punjab during 19th-21st November.

Wind warning:

- Southeast Bay of Bengal: Gale wind speed 70-80 kmph gusting to 90 kmph is prevailing. It is likely to becoming 80-90 kmph gusting to 100 kmph from morning of 17th November, 60-70 kmph gusting to 80 kmph on 18th November and decrease thereafter.
- Southwest Bay of Bengal: Gale wind speed reaching 65-75 kmph gusting to 85 kmph is prevailing. It is likely to becoming 70-80 kmph gusting 90 kmph from morning 17th and 100-110 kmph gusting to 120 kmph on 18th November, 60-70 kmph gusting to 80 kmph on 19th & 20th November.
- Westcentral Bay of Bengal: Gale wind speed reaching 70-80 kmph gusting to 90 kmph is prevailing. It is likely to increase becoming 100-110 kmph gusting to 120 kmph from 18th morning 120-130 kmph gusting to 145 kmph from 19th evening till landfall on 20th November. It will decrease gradually thereafter.
- Eastcentral Bay of Bengal: Squally wind speed reaching 50-60 kmph gusting to 70 kmph is likely to prevail till 18th November evening and decease thereafter.
- Northwest Bay of Bengal: Squally wind speed reaching 40-50 kmph gusting to 60 kmph is likely to prevail from night of 18th November, likely to increase becoming 50-60 gusting to 70 kmph from 19th morning till 20th November.
- Along & off North Tamil Nadu & Puducherry coasts: Squally wind speed reaching 40-50 gusting to 60 kmph till 18th November and 50-60 gusting to 70 kmph on 19th & 20th November.
- Along & off Andhra Pradesh & Yanam coasts: Squally wind speed reaching 40-50 gusting to 60 kmph till 17th November. It is likely to increase gradually becoming gale wind speed reaching 60-70 gusting to 80 kmph from 18th November evening and 120-130 gusting to 145 kmph from 19th night till landfall on 20th November. It will decrease gradually thereafter.
- Along & off Odisha coast: Squally wind speed reaching 40-50 gusting 60 kmph is likely night of 18th November and likely to increase becoming 50-60 gusting to 70 kmph from 19th November morning till 20th November.

Sea condition:

- Southeast Bay of Bengal: Very rough to high sea condition is likely to prevail till 18th November and improve thereafter.
- Southwest Bay of Bengal: Very rough to high sea condition is prevailing and it is likely to deteriorate becoming high to very high till 20th November and improve thereafter.
- Westcentral Bay of Bengal: High Sea condition is prevailing; it is likely to deteriorate becoming high to very high from afternoon of 17th to 18th November and very high to phenomenal from 19th till landfall on 20th November. It is likely to improve thereafter becoming very rough to rough by 21st November morning.
- Eastcentral Bay of Bengal: Rough to very rough sea condition is likely to prevail till 18th November.
- Northwest Bay of Bengal: Rough to very rough sea condition is very likely form night of 18th till 20th November.
- Along & off North Tamil Nadu & Puducherry coasts: Rough to very rough sea condition is very likely till 20th November.
- Along & off Andhra Pradesh & Yanam coasts: Rough to very rough sea condition is very likely on 17th November. It is likely to deteriorate gradually becoming very rough to high on 18th, high to very high on 19th November morning and phenomenal from 19th evening till landfall on 20th November. It is likely to improve becoming very rough to rough by 21st November morning.
- Along & off Odisha coast: Rough to very rough sea condition is very likely from 18th November night till 20th November.

Storm Surge Warning:

- Storm surge of 1.0 to 2.0 m height above astronomical tide is very likely to inundate low lying areas of Andhra Pradesh (Prakasam, Bapatla, Krishna, West Godavari, Konaseema and Kakinada districts) during the time of landfall. The peak surge is expected over Bapatla, Krishna and West Godavari districts from 20th morning till afternoon and improve gradually thereafter. However, storm surge of 0.5 m height above astronomical tide is likely to continue from early hours to evening of 20th November along and off above districts.

Fisherman warning:

Fishermen are advised not to venture into

- Southeast Bay of Bengal from till 18th November.
- Southwest Bay of Bengal till 20th November.
- Westcentral Bay of Bengal till 20th November.
- Eastcentral Bay of Bengal till 18th November.
- Northwest Bay of Bengal during 19th - 20th November.

Weather conditions and forecast over Delhi/NCR during next 4 days (Annexure III)

Annexure III

Weather forecast over Delhi/NCR during 17th Nov. to 20th Nov. 2026

Past Weather:

There has been fall in maximum temperatures by 2-3°C and fall in minimum temperatures by 1-3°C over Delhi during the past 24 hours. The maximum temperatures were in the range of 26-27°C and the minimum temperatures are in the range 12-15°C respectively during past 24 hours over Delhi. The minimum temperatures are normal (-1.5°C to 1.5°C) over Delhi during the past 24 hours. The maximum temperatures were below normal (-1.6°C to -3.0°C) at isolated places and normal (-1.5°C to 1.5°C) over remaining parts of Delhi during the past 24 hours. Mainly clear sky with surface wind speeds up to 20 kmph from the southwest direction prevailed over Delhi during past 24 hours. Mainly clear sky with surface wind speeds up to 10 kmph from the southwest directions prevailed during forenoon over the region today.

Weather Forecast:

17.11.2026: Mainly clear sky. The maximum temperatures over Delhi are likely to be in the range of 26-28°C. The maximum temperature will be near normal (-1.5°C to 1.5°C) at most places over Delhi. The predominant surface wind is likely to be from the northwest direction with surface wind speed reaching up to 15 kmph during the afternoon. The surface wind speed will decrease becoming up to 10 kmph from the northwest direction during evening and night hours.

18.11.2026: Mainly clear sky. Mist/shallow fog at most places with moderate fog at isolated places in the morning hours. The maximum and minimum temperatures over Delhi are likely to be in the range of 25°C to 27°C and 12°C to 14°C, respectively. The minimum temperature will be near normal (-1.5°C to 1.5°C) at many places with above normal (1.6°C to 3.0°C) at isolated place, and the maximum temperatures will be below normal (-1.6°C to -3.0°C) at most places over Delhi. The surface wind speed will reach up to 10 kmph from the northwest direction during the morning hours. The surface wind speed will decrease becoming up to 08 kmph from the northwest direction during afternoon. The surface wind speed will remain calm gradually becoming up to 05 kmph from the north direction during evening and night hours.

19.11.2026: Mainly clear sky. Shallow fog at most places with moderate fog at a few places in the morning hours. The maximum and minimum temperatures over Delhi are likely to be in the range of 24°C to 26°C and 11°C to 13°C, respectively. The minimum temperature will be near normal (-1.5°C to 1.5°C) at many places, and the maximum temperatures will be below normal (-1.6°C to -3.0°C) at most places over Delhi. The surface wind speed will remain calm gradually becoming up to 05 kmph from the north direction during the morning hours. The surface wind speed will increase becoming up to 10 kmph from the northwest direction during afternoon. The surface wind speed will remain calm gradually becoming up to 05 kmph from the east direction during evening and night hours.

20.11.2026: Mainly clear sky. Shallow fog at most places with moderate fog at a few places in the morning hours. The maximum and minimum temperatures over Delhi are likely to be in the range of 24°C to 26°C and 11°C to 13°C, respectively. The minimum temperature will be near normal (-1.5°C to 1.5°C) at many places, and the maximum temperatures will be below normal (-1.6°C to -3.0°C) at most places over Delhi. The predominant surface wind will remain calm gradually becoming up to 05 kmph from the southeast direction during the morning hours. The surface wind speed will increase becoming up to 10 kmph from the north east direction during afternoon. The surface wind speed will remain calm gradually becoming up to 05 kmph from the east direction during evening and night hours.

Impact Expected and Action Suggested due to extremely/ very heavy rainfall:

- **Heavy to very heavy rainfall at a few places with isolated extremely heavy rainfall likely over Coastal Andhra Pradesh & Yanam during 19th-20th November**
- **Isolated very heavy rainfall also likely over Telangana during 20th-21st November and Odisha during 19th-21st November.**

Impact expected:

- Breaking of tree branches, uprooting of small trees like banana, papaya, drum sticks. Strong wind and rain may damage plantation, horticulture and standing crops.
- Partial damage to vulnerable structures due to strong winds and rain.
- Minor damage to kutcha houses/walls, huts and roads due to heavy rain.
- Loose objects may fly.
- Small ships, trawlers and boats may be affected.
- Road and rail traffic may be affected due to heavy rain and squally winds.
- There could be localised landslides, mudslides, landslips, water logging, inundation and flooding over low lying areas.
- Occasional reduction in visibility due to heavy rainfall.
- Helicopter services may get affected.

Action suggested:

- People are advised to keep a watch on the weather for worsening conditions and be ready to move to safer places accordingly.
- Take safe shelters; do not take shelter under trees, as there could be lightning.
- In case of expected lightning, unplug electrical/ electronic appliances, immediately, get out of water bodies and keep away from all the objects that conduct electricity.
- Tourism and recreational activities to be regulated.
- Onshore and offshore activities to be judiciously regulated.
- Helicopter services to be regulated.

Impact expected due to dense fog in the night /morning hours:

- **Dense fog conditions** very likely over East Uttar Pradesh and West Uttar Pradesh during 17th-18th November; Haryana Chandigarh & Delhi and Punjab during 19th-21st November.

- Transport and Aviation:
  - May affect some airports, highways and railway routes in the areas of met- sub-division.
  - Difficult driving conditions with slower journey times.
  - Unless taken precautionary measures, it may lead to some road traffic collisions.

- Power Sector:
  - Chances of Tripping of Power lines in the very dense fog routes.
- Human Health:
  - Lung related health impacts: Dense fog contains particulate matter and other pollutants and in case exposed it gets lodged in the lungs, clogging them and decreasing their functional capacity which increases episodes of wheezing, coughing and shortness of breath.
  - Impact on people having asthma bronchitis: Long time exposure to dense fog may cause respiratory problem for people having asthma bronchitis and other lung related health problems.
  - Eye Irritation: Dense fog contains pollutions of various types and these Pollutants in the air if exposed may tend to irritate the membranes of the eye causing various infections leading to redness or swelling of the eye.

Action suggested:

- Transport and Aviation:
  - Be careful while driving or outing through any transport.
  - Use fog lights during driving.
  - Be in touch with airlines, railways and state transport for schedule of your journey.
- Power Sector:
  - To keep ready Maintenance Team.
  - Human Health: To avoid outing until unless emergency and to cover the face.

Agromet advisories for likely impact of Heavy Rainfall

- In **Coastal Andhra Pradesh,** harvest matured crops of rice, maize, groundnut, cotton and vegetables and matured fruits of banana and papaya immediately and keep the harvested produce in a safe place. Postpone sowing of *rabi* crops such as green gram, black gram, maize and sunhemp. Make necessary arrangements for draining excess water from fields of rice, red gram, cotton, maize, sugarcane, turmeric, ginger, niger, rajmash, ragi and vegetables; plantations of banana and already sown crops of *rabi* maize and sunhemp. Provide adequate support to banana, coffee, black pepper and other plantation crops to minimize damage due to strong winds.
- In **Rayalseema,** harvest the matured fruits and vegetables. Strengthen the field bunds and clear the drainage channels in standing crops such as rice, pulses, vegetables etc. to remove excess water. Take up propping in banana and arrange for staking in vegetables to prevent lodging due to strong winds. Delay sowing of *rabi* crops like groundnut, sunflower, red gram, bajra, short duration pulse crops and fodder crops.
- In **Odisha,** harvest matured crops of rice, maize, finger millet, green gram, black gram, groundnut and seasonal vegetables immediately and store the harvested produce in a safe and covered place. Pick fully opened cotton bolls and store them in safe place. Cover vegetables nurseries like tomato, chilli and brinjal using plastic covers or polythene sheets. Make provision to drain excess water from standing rice fields, vegetable nurseries and recently sown fields of mustard, groundnut, green gram and black gram. Provide additional support to weak plants using wooden sticks or bamboo poles.
- In **Telangana,** harvest matured crops of *kharif* rice, maize and turmeric and keep the produce in safe place. Postpone sowing of rice nurseries and *rabi* crops such as sorghum, maize, sesame, sunflower, safflower, chickpea, mustard, groundnut, cowpea, black gram, green gram. Provide adequate drainage channels in already sown fields of jowar, maize, groundnut and Bengal gram to facilitate quick removal of excess rainwater.
- In **Tamil Nadu,** harvest matured crops of rice, groundnut, pulses and millets immediately and store the harvested produce in safe and dry places. Strengthen field bunds and drainage channels in rice fields to drain out excess rainwater. Provide staking to tomato, chilli and creeper vegetables. Clear drainage around coconut basins and harvest mature nuts.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.

Legends & abbreviations:

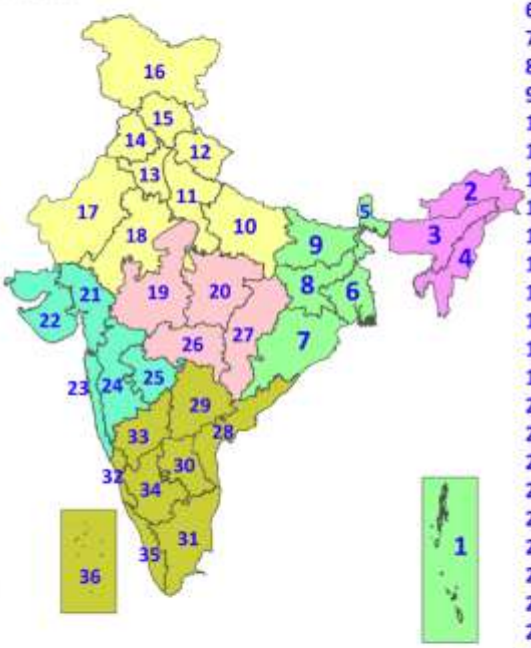

Heavy Rain:64.5-115.5mm; **Very Heavy Rain:**115.6-204.4mm; **Extremely Heavy Rain:** >204.4mm.

32. Coastal Karnataka
33. North Interior Karnataka
34. South Interior Karnataka
35. Kerala & Mahe
36. Lakshadweep

SPATIAL DISTRIBUTION (% of Stations reporting)

% Stations	Category	% Stations	Category
76-100	Widespread (WS/Most Places)	26-50	Scattered (SCT/A Few Places)
51-75	Fairly Widespread (FWS/Many Places)	1-25	Isolated (ISOL)

Fog
Heavy Rain
Very Heavy Rain
Extremely Heavy Rain
Thunder & Lightning
Hailstorm
Dust Raising Winds

Heavy Snow
Dust Storm
Heat Wave
Warm Night
Hot Day
Hot & Humid
Strong Surface Winds

Cold Wave
Cold Day
Ground Frost

COLOUR CODED WARNING

- No Warning (No Action)
- Watch (Be Aware)
- Alert (Be Prepared To Take Action)
- Warning (Take Action)

Probabilistic Forecast

Terms	Probability of Occurrence (%)
Unlikely	< 25
Likely	25 - 50
Very Likely	50 - 75
Most Likely	> 75

* Red colour warning does not mean "Red Alert", Red colour warning means "Take Action".
Forecast and Warning for any day is valid from 0830 hours IST of day till 0830 hours IST of next day.

DEFINITION/CRITERIA

Rain/ Snow *

- **Heavy:** 64.5 to 115.5 mm/cm *
- **Very Heavy:** 115.6 to 204.4 mm/cm*
- **Extremely Heavy:** > 204.4 mm/cm *

Heat Wave

When maximum temperature of a station reaches ≥40° C for plains and ≥30° C for hilly regions

(a) Based on Departure from normal

- **Heat Wave:** Maximum Temperature Departure from normal 4.5° C to 6.4° C.
- **Severe Heat Wave:** Maximum Temperature Departure from normal ≥6.5° C

(b). Based on Actual maximum temperature

- **Heat Wave:** When actual maximum temperature ≥45°C.
- **Severe Heat Wave:** When actual maximum temperature ≥47°C

(c). Criteria for heat wave for coastal stations

When maximum temperature departure is >4.5°C from normal. Heat Wave may be described provided maximum temperature ≥37°C

Warm Night

When maximum temperature remains 40°C

- **Warm Night:** When minimum temperature departure 4.5 °C to 6.4 °C.
- **Severe Warm Night:** When minimum temperature departure >6.4 °C.

Cold Wave

When minimum temperature of a station ≤10°C for plains and ≤0°C for hilly regions.

(a). Based on departure

- **Cold Wave:** Minimum Temperature Departure from normal -4.5 °C to -6.4 °C.
- **Severe Cold Wave:** Minimum Temperature Departure from normal ≤ -6.5 °C

(b) Based on actual Minimum Temperature (for Plains only)

- **Cold Wave :** When Minimum Temperature is ≤ 4.0 °C
- **Severe Cold Wave:** When Minimum Temperature is ≤ 2.0 °C

(c) For Coastal Stations

When Minimum Temperature departure is ≤-4.5 °C & actual Minimum Temperature is ≤ 15 °C

Cold Day

When minimum temperature of a station ≤10°C for plains and ≤0°C for hilly regions

Based on departure

- **Cold Day:** Maximum Temperature Departure from normal -4.5 °C to -6.4 °C.
- **Severe Cold Day:** Maximum Temperature Departure from normal ≤ -6.5 °C

Fog

Phenomenon of small droplets suspended in air and the horizontal visibility < 1km

- **Moderate Fog:** When the visibility between 500-200 metres
- **Dense Fog:** when the visibility between 50- 200 metres
- **Very Dense Fog:** when the visibility < 50 metres

Thunderstorm

Sudden electrical discharges manifested by a flash of light (Lightning) and a sharp rumbling sound (thunder)

Dust/Sand Storm

An ensemble of particles of dust or sand energetically lifted to great heights by a strong and turbulent wind.

Frost

Ice deposits on ground

- Air temperature ≤4°C (over Plains)

Squall

A strong wind that rises suddenly, lasts for atleast 1 minute.

- **Moderate**: Wind speed 52-61 kmph
- **Severe**: Wind speed 62-87 kmph
- **Very Severe**: Wind speed >87 kmph

Sea State

Effect of various waves in the sea over specific area

- **Rough to very rough**: Wind speed 41-62 kmph (22-33 knots) & Wave height 2.5-6 metre
- **High to very high**: Wind speed 63-117 kmph (34-63 knots) & Wave height 6-14 metre
- **Phenomenal**: Wind speed >117 kmph (>63 knots) & Wave height >14 metre

Cyclone

- **Cyclonic Storm**: Wind speed 62-87 kmph (34-47 knots)
- **Severe Cyclonic Storm**: Wind speed 88-117 kmph (48-63 knots)
- **Very Severe Cyclonic Storm**: Wind speed 118-165 kmph (64 - 89 knots)
- **Extremely Severe Cyclonic Storm**: Wind speed 166-220 kmph (90 -119 knots)
- **Super Cyclone Strom**: Wind speed >220 kmph (>119 knots)

* Red colour warning does not mean "Red Alert", Red colour warning means "Take Action".

Forecast and Warning for any day is valid from 0830 hours IST of day till 0830 hours IST of next day.
