Press Release
Date: 19th November 2026
Time of Issue:1350 hours IST

Subject:(i) The Severe Cyclonic Storm "Akvan" [Pronunciation: Akvan] over the westcentral Bay of Bengal is likely to move north-northwestwards and cross North Andhra Pradesh & Yanam and South Odisha coasts between Narsapur and Puri, close to east of Gopalpur, by noon of 20th November, 2026 with the maximum sustained wind speed of 90-100 kmph gusting to 110 kmph.
(ii) Under the influence of the above system, isolated extremely heavy rainfall likely over Coastal Andhra Pradesh & Yanam on 19th November and over Odisha on 19th & 20th November.

Realized weather during past 24 hours ending at 0830 hours IST of today, the 19th November, 2026:

- **Dense to very Dense fog (visibility < 200 m)** in isolated pockets of East Uttar Pradesh.
- **Visibility reported (< 200 meters) East Uttar Pradesh:** Ballia (OBS)-30, Azamgarh (AMS) & Ayodhya (AMS)-50 each.

Weather Systems, Forecast and Warnings (Annexure I & II):

- Yesterday's **Severe Cyclonic Storm "Akvan" [Pronunciation: Akvan]** over the central parts of south & adjoining westcentral Bay of Bengal moved north-northwestwards and lay centered at westcentral Bay of Bengal at 2330 hours IST of today, the 18th November, 2026. It further moved northwards and lay over the same region at 0830 hours IST of today, the 19th November, near Latitude 14.9°N and Longitude 85.3°E, about 420 km east-southeast of Narsapur (Andhra Pradesh), 400 km south-southeast of Kalingapatnam (Andhra Pradesh), 490 km south of Gopalpur (Odisha) and 550 km south of Puri (Odisha) and 590 km east-northeast of Chennai (Tamil Nadu). It is likely to move north-northwestwards and cross North Andhra Pradesh & Yanam and South Odisha coasts between Narsapur and Puri, close to east of Gopalpur, by noon of 20th November, 2026 with the maximum sustained wind speed of 90-100 kmph gusting to 110 kmph.
- An **upper air cyclonic circulation** lies over Northeast Assam & neighbourhood in lower tropospheric levels.
- An **upper air cyclonic circulation** lies over Southeast Arabian Sea & adjoining south Lakshadweep area in lower tropospheric levels.
- An **upper air cyclonic circulation** lies over east Bangladesh & neighbourhood in lower tropospheric levels.
- A feeble **Western Disturbance** as a trough in middle tropospheric westerlies with its axis in middle tropospheric levels now runs roughly along Long. 75°E to the north of Lat. 33°N.

Under the influence of above systems, the following weather is likely:

South Peninsular India:

- **Isolated to Scattered** rainfall likely over Coastal Andhra Pradesh & Yanam, Kerala & Mahe, Rayalaseema and Tamil Nadu, Puducherry & Karaikal during 19th-25th November; Coastal Karnataka and Lakshadweep on 25th November; South Interior Karnataka during 24th-25th November; Telangana during 20th-21st November.
- Isolated thunderstorm, lightning & gusty winds (speed reaching 80-90 kmph) likely over Coastal Andhra Pradesh & Yanam on 19th November.
- Isolated **thunderstorm & lightning** likely over Tamil Nadu, Puducherry & Karaikal during 23rd-25th November; Rayalaseema on 23rd November.
- Isolated **heavy rainfall** likely over Tamil Nadu, Puducherry & Karaikal during 23rd-25th November with isolated **very heavy rainfall** also likely over Coastal Andhra Pradesh & Yanam on 20th November.
- Isolated **extremely heavy rainfall** likely over Coastal Andhra Pradesh & Yanam on 19th November.
- **Thundersquall (wind speed reaching 60-70 kmph gusting to 80 kmph)** likely over Coastal Andhra Pradesh & Yanam on 20th November.

East India:

- **Isolated to Scattered** rainfall likely over Andaman & Nicobar Islands during 19th-25th November; Sub-Himalayan West Bengal & Sikkim during 20th-23rd November; Gangetic West Bengal during 22nd-23rd

November; Jharkhand on 19th November and during 22nd-23rd November; Bihar during 21st-22nd November; Odisha during 21st-23rd November.

- **Fairly Widespread to Widespread** rainfall likely over Gangetic West Bengal during 19th-21st November; Jharkhand during 20th-21st November; Odisha during 19th-20th November.
- Isolated **thunderstorm, lightning & gusty winds (speed reaching 40-50 kmph gusting to 60 kmph)** likely over Gangetic West Bengal during 19th-20th November; Odisha on 21st November, **with gusty winds (speed reaching 30-40 kmph gusting to 50 kmph)** likely over Sub-Himalayan West Bengal & Sikkim during 20th-21st November; Bihar and Gangetic West Bengal on 21st November; Jharkhand during 19th-20th November.
- Isolated **heavy rainfall** likely over southeast Bihar, Gangetic West Bengal and Odisha on 21st November; Jharkhand on 19th November and on 21st November with isolated **very heavy rainfall** also likely over Gangetic West Bengal during 19th-20th November; Jharkhand on 20th November.
- Isolated **extremely heavy rainfall** likely over Odisha during 19th-20th November.
- **Thundersquall (wind speed reaching 70-80 kmph gusting to 90 kmph)** likely over Odisha during 19th-20th November.

Central India:

- **Isolated to Scattered** rainfall likely over West Madhya Pradesh during 21st-22nd November; East Madhya Pradesh during 20th-22nd November; Vidarbha during 20th-21st November; Chhattisgarh on 19th November and during 22nd-25th November.
- **Fairly Widespread to Widespread** rainfall likely over Chhattisgarh during 20th-21st November.
- Isolated **thunderstorm, lightning & gusty winds (speed reaching 40-50 kmph gusting to 60 kmph)** likely over Chhattisgarh during 20th-21st November, **with gusty winds (speed reaching 30-40 kmph gusting to 50 kmph)** likely over East Madhya Pradesh during 20th-22nd November.
- Isolated **heavy rainfall** likely over Chhattisgarh during 20th-21st November.

Northeast India:

- **Isolated to Scattered** rainfall likely over Arunachal Pradesh and Assam & Meghalaya during 19th-25th November; Nagaland, Manipur, Mizoram & Tripura during 21st-25th November.
- **Fairly Widespread to Widespread** rainfall likely over Nagaland, Manipur, Mizoram & Tripura during 19th-20th November.
- Isolated **thunderstorm, lightning & gusty winds (speed reaching 40-50 kmph gusting to 60 kmph)** likely over Nagaland, Manipur, Mizoram & Tripura during 19th-21st November, **with gusty winds (speed reaching 30-40 kmph gusting to 50 kmph)** likely over Assam & Meghalaya on 21st November.
- Isolated **thunderstorm & lightning** likely over Assam & Meghalaya during 19th-20th November.
- Isolated **heavy rainfall** likely over Assam & Meghalaya on 20th November; Nagaland, Manipur, Mizoram & Tripura during 19th-21st November with isolated **very heavy rainfall** also likely over Assam & Meghalaya on 21st November.

Fog warning:

- Dense fog conditions very likely over East Uttar Pradesh on 19th November and during 22nd-23rd November; Haryana Chandigarh & Delhi and Punjab during 20th-22nd November; West Uttar Pradesh during 21st-23rd November.

Wind warning:

- Southwest Bay of Bengal: Gale wind speed reaching 60-70 kmph gusting to 80 kmph is prevailing over northern parts of southwest Bay of Bengal and likely to continue till mid night of 19th November. It will decrease gradually thereafter.
- Westcentral Bay of Bengal: Gale wind speed reaching 90-100 kmph gusting to 110 kmph is prevailing and will continue till landfall on 20th noon. It will decrease gradually thereafter.
- Eastcentral Bay of Bengal: Squally wind speed reaching 50-60 kmph gusting to 70 kmph is likely to prevailing and decease gradually from afternoon of 19th November.
- Northwest Bay of Bengal: Squally wind speed reaching 50-60 kmph gusting to 70 kmph is prevailing. It is likely to increase becoming Gale wind speed reaching 70-80 gusting to 90 kmph from 19th forenoon till 20th November noon and decease thereafter.
- Along & off North Tamil Nadu & Puducherry coasts: Squally wind speed reaching 40-50 gusting to 60 kmph on 19th November and decease thereafter.
- Along & off North Andhra Pradesh & Yanam coasts: Gale wind speed reaching 60-70 gusting to 80 kmph is likely to prevail from 19th afternoon; 90-100 gusting to 110 kmph from19th Nov mid night till landfall on 20th Nov noon and decrease gradually thereafter.
- Along & off South Odisha coasts: Squally wind speed reaching 50-60 kmph gusting to 70 kmph is prevailing and likely to increase becoming 70-80 gusting to 90 kmph from 19th midnight till 20th November afternoon and decease thereafter.
- Along & off North Odisha, South Andhra Pradesh & West Bengal coasts: Squally wind speed reaching 50-60 gusting 70 kmph from is likely to prevail from 19th Nov afternoon till 20th Nov noon and decrease thereafter.

Sea condition:

- Northern parts of Southwest Bay of Bengal: Very rough to high sea condition is prevailing and it is likely to deteriorate becoming high to very high till midnight of 19th November and improve thereafter.
- Westcentral Bay of Bengal: Very High Sea condition is prevailing; it is likely to continue till landfall on 20th November. It is likely to improve thereafter becoming very rough to rough by 21st November morning.
- Eastcentral Bay of Bengal: Rough to very rough sea condition is likely to prevail till afternoon of 19th November and improve thereafter.
- Northwest Bay of Bengal: Rough to very rough sea condition is likely to prevail till afternoon of 19th November and becoming high from 19th afternoon to 20th November noon and improve thereafter.
- Along & off North Tamil Nadu & Puducherry coasts: Rough to very rough sea condition is very likely till 20th November.
- Along & off North Andhra Pradesh & Yanam coasts: High sea condition is prevailing till 19th afternoon; Becoming High to very high from 19th Nov midnight till landfall on 20th Nov Noon and improve thereafter.
- Along & off South Odisha coasts: Rough to very rough sea condition is prevailing and likely to becoming high from 19th midnight till 20th November afternoon and improve thereafter.
- Along & Off adjoining areas of North Odisha, South Andhra Pradesh & West Bengal coasts: Rough Sea condition is prevailing: Becoming very rough to high from 19th Nov. afternoon till landfall on 20th Nov noon and improve gradually thereafter.

Storm Surge Warning:

- Storm surge of 0.5 to 1.0 m height above astronomical tide is very likely to inundate low lying areas of Andhra Pradesh (West Godavari, Konaseema, Kakinada, Vizianagaram, Srikakulam and Visakhapatnam districts) and south coastal Odisha (Ganjam and Puri districts) during the time of landfall.

Fisherman warning: Fishermen are advised not to venture into

- Northern parts of Southwest Bay of Bengal till 20th November.
- Westcentral Bay of Bengal till 21st November morning.
- Eastcentral Bay of Bengal till 19th November.
- Northwest Bay of Bengal till 21st November morning.

Weather conditions and forecast over Delhi/NCR during next 4 days (Annexure III)

Annexure III

Weather forecast over Delhi/NCR during 19th Nov. to 22nd Nov. 2026

Past Weather:

There has no large change in maximum temperatures and rise in minimum temperatures by 1-2°C over Delhi during the past 24 hours. The maximum temperatures were in the range of 25-28°C and the minimum temperatures are in the range 11-13°C respectively during past 24 hours over Delhi. The minimum temperatures are below normal (-1.6°C to -3.0°C) at many places and normal (-1.5°C to 1.5°C) over remaining parts of Delhi during the past 24 hours. The maximum temperatures were below normal (-1.6°C to -3.0°C) at isolated places and normal (-1.5°C to 1.5°C) over remaining parts of Delhi during the past 24 hours. Mainly clear sky with surface wind speeds up to 15 kmph from the west direction prevailed over Delhi during past 24 hours. Mainly clear sky with surface wind speeds up to 10 kmph from the southwest directions prevailed during forenoon over the region today.

Weather Forecast:

19.11.2026: Mainly clear sky. The maximum temperatures over Delhi are likely to be in the range of 25-27°C. The maximum temperature will be below normal (-1.5°C to -3.0°C) at many places over Delhi. The predominant surface wind will likely to be from the northwest direction with surface wind speed reaching up to 15 kmph during the afternoon. The surface wind speed is likely to be associated with calm wind reaching up to 05 kmph from the northwest direction during evening and night hours.

20.11.2026: Mainly clear sky. Shallow fog at most places with moderate fog at isolated places in the morning hours. The maximum and minimum temperatures over Delhi are likely to be in the range of 25°C to 27°C and 11°C to 13°C, respectively. The minimum temperature will be near normal (-1.5°C to 1.5°C) at most places, and the maximum temperatures will be below normal (-1.6°C to -3.0°C) at most places over Delhi. The predominant surface wind is likely to be from the northeast direction associated with calm wind reaching up to 05 kmph during the morning hours. The surface wind speed will increase becoming up to 10 kmph from the northeast direction during afternoon. The surface wind speed is likely to be associated with calm wind reaching up to 05 kmph from the east direction during evening and night hours.

21.11.2026: Partly cloudy sky. Shallow fog at most places with moderate fog at a few places in the morning hours. The maximum and minimum temperatures over Delhi are likely to be in the range of 25°C to 27°C and 13°C to 15°C, respectively. The minimum temperature will be above normal (1.6°C to 3.0°C) at many places, and the maximum temperatures will be below normal (-1.6°C to -3.0°C) at most places over Delhi. The predominant surface wind is likely to be from the southeast direction with wind speed up to 10 kmph during the morning hours. The surface wind speed will decrease becoming up to 08 kmph from the southeast direction during afternoon. The surface wind speed will increase becoming up to 10 kmph from the southeast direction during evening and night hours.

22.11.2026: Partly cloudy sky. Mist/shallow fog at many places in the morning hours. The maximum and minimum temperatures over Delhi are likely to be in the range of 25°C to 27°C and 12°C to 14°C, respectively. The minimum temperature will be above normal (1.6°C to 3.0°C) at most places, and the maximum temperatures will be near normal (-1.5°C to 1.5°C) at most places over Delhi. The predominant surface wind is likely to be from the southeast direction with wind speed up to 10 kmph during the morning hours. The surface wind speed will decrease becoming up to 08 kmph from the north direction during afternoon. The surface wind speed is likely to be associated with calm wind reaching up to 05 kmph from the northeast direction during evening and night hours.

Impact Expected and Action Suggested due to extremely/ very heavy rainfall:

- Isolated **extremely heavy rainfall** likely over Coastal Andhra Pradesh & Yanam on 19th and over Odisha during 19th-20th November.
- Isolated **very heavy rainfall** also likely over Gangetic West Bengal during 19th-20th; Jharkhand on 20th; over Coastal Andhra Pradesh & Yanam on 20th; over Assam & Meghalaya on 21st November.

Impact expected:

- Breaking of tree branches, uprooting of small trees like banana, papaya, drum sticks. Strong wind and rain may damage plantation, horticulture and standing crops.
- Partial damage to vulnerable structures due to strong winds and rain.
- Minor damage to kutcha houses/walls, huts and roads due to heavy rain.
- Loose objects may fly.
- Small ships, trawlers and boats may be affected.
- Road and rail traffic may be affected due to heavy rain and squally winds.
- There could be localised landslides, mudslides, landslips, water logging, inundation and flooding over low lying areas.
- Occasional reduction in visibility due to heavy rainfall.
- Helicopter services may get affected.

Action suggested:

- People are advised to keep a watch on the weather for worsening conditions and be ready to move to safer places accordingly.
- Take safe shelters; do not take shelter under trees, as there could be lightning.
- In case of expected lightning, unplug electrical/ electronic appliances, immediately, get out of water bodies and keep away from all the objects that conduct electricity.
- Tourism and recreational activities to be regulated.
- Onshore and offshore activities to be judiciously regulated.
- Helicopter services to be regulated.

Impact expected due to dense fog in the night /morning hours:

- Dense fog conditions very likely over East Uttar Pradesh on 19th November and during 22nd-23rd November; Haryana Chandigarh & Delhi and Punjab during 20th-22nd November; West Uttar Pradesh during 21st-23rd November.

- Transport and Aviation:
  - May affect some airports, highways and railway routes in the areas of met- sub-division.
  - Difficult driving conditions with slower journey times.
  - Unless taken precautionary measures, it may lead to some road traffic collisions.

- Power Sector:
  - Chances of Tripping of Power lines in the very dense fog routes.
- Human Health:
  - Lung related health impacts: Dense fog contains particulate matter and other pollutants and in case exposed it gets lodged in the lungs, clogging them and decreasing their functional capacity which increases episodes of wheezing, coughing and shortness of breath.
  - Impact on people having asthma bronchitis: Long time exposure to dense fog may cause respiratory problem for people having asthma bronchitis and other lung related health problems.
  - Eye Irritation: Dense fog contains pollutions of various types and these Pollutants in the air if exposed may tend to irritate the membranes of the eye causing various infections leading to redness or swelling of the eye.

Action suggested:

- Transport and Aviation:
  - Be careful while driving or outing through any transport.
  - Use fog lights during driving.
  - Be in touch with airlines, railways and state transport for schedule of your journey.
- Power Sector:
  - To keep ready Maintenance Team.

- Human Health: To avoid outing until unless emergency and to cover the face.

Agromet advisories for likely impact of Heavy Rainfall

- In **Coastal Andhra Pradesh,** postpone sowing of *rabi* crops such as green gram, black gram, maize, ragi and sunhemp. Make necessary arrangements for draining excess water from fields of rice, red gram, cotton, maize, sugarcane, turmeric, ginger, niger, rajmash, ragi and vegetables; plantations of banana and and already sown *rabi* crops. Provide adequate support to banana, coffee, black pepper and other plantation crops to minimize damage due to strong winds.
- In **Odisha,** postpone sowing of *rabi* crops such as mustard, toria, groundnut, sunflower, green gram, black gram, chickpea and lentil. Cover vegetables nurseries like tomato, chilli and brinjal using plastic covers or polythene sheets, if feasible. Make provision to drain excess water from standing rice fields, vegetable nurseries and recently sown fields of *rabi* crops. Provide support to the crops like banana and papaya. Arrange for strong staking in vegetables.
- In **Gangetic West Bengal**, harvest mature aman rice immediately and keep the harvested produce in a safe, elevated and covered place or heap the harvested produce in the field and cover it properly with polythene. Harvest mature fruits of brinjal, papaya and banana. Make proper arrangement for draining out excess water from fields of standing crops, winter vegetables and betel vine garden. Postpone the land preparation and sowing of *rabi* crops such as mustard, rapeseed, lentil and potato. Strengthen trellises for climbing vegetables like beans and gourds.
- In **Jharkhand,** postpone harvesting of pigeon pea and late sown and long duration rice crop. Store the already harvested produce in a safe and dry place as soon as possible. Postpone sowing of wheat, mustard, rapeseed and vegetables. Ensure proper drainage facilities in vegetable nurseries and fields of potato and pulses. Provide staking to vegetable crops such as tomato, chilli and brinjal to prevent from lodging.
- In **Chhattisgarh**, keep harvested produce of rice in safe and elevated place at the earliest. Postpone the sowing of *rabi* crops such as chickpea, wheat, mustard and vegetables (cauliflower, broccoli, beetroot, late-season cucumber and late-season bitter gourd). Make provision to drain excess water from the standing crop fields. Provide support / staking to banana and tomato plants; support for vine-type vegetables such as bitter gourd, bottle gourd and other cucurbitaceous vegetables.

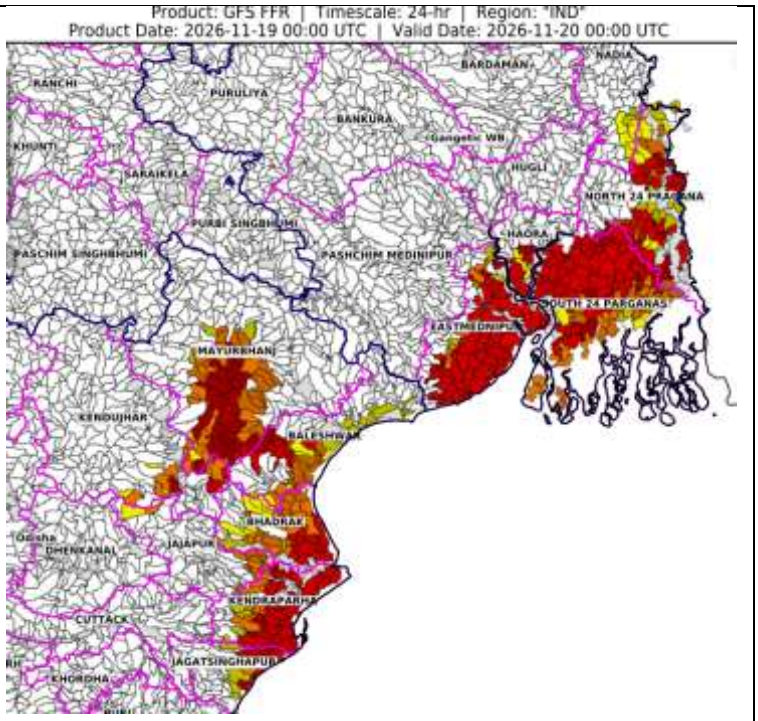

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.

Flash Flood Warning:

Flash Flood Risk (FFR) till 1130 IST of 20-11-2026: Moderate flash flood risk likely over few watersheds & neighbourhoods of following Met Sub-divisions during next 24 hours. Odisha: Jagatsinghpur, Kendrapara, Bhadrak, Balasore, Mayurbhanj, Keonjhargarh and Jajpur districts Gangetic West Bengal: East Midnapore, Howrah, North 24 Parganas, South 24 Parganas and Nadia districts Surface runoff/ Inundation may occur at some fully saturated soils & low-lying areas over Area of Concern (AoC) as shown in map due to expected rainfall occurrence in next 24 hours.	

Legends & abbreviations:

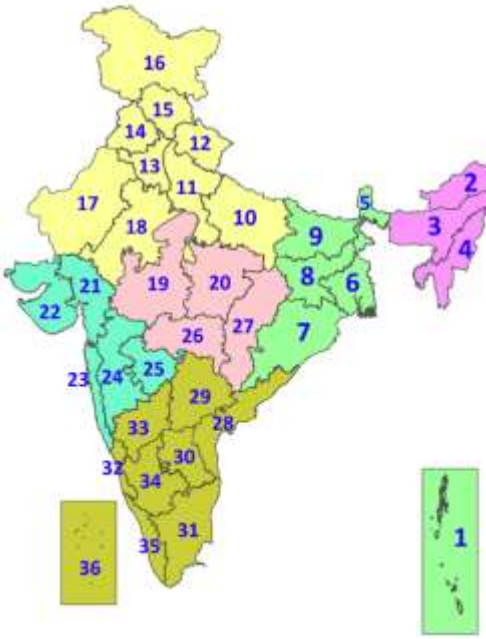

Heavy Rain:64.5-115.5mm; **Very Heavy Rain:**115.6-204.4mm; **Extremely Heavy Rain:** >204.4mm.

SPATIAL DISTRIBUTION (% of Stations reporting)

% Stations	Category	% Stations	Category
76-100	Widespread (WS/Most Places)	26-50	Scattered (SCT/A Few Places)
51-75	Fairly Widespread (FWS/Many Places)	1-25	Isolated (ISOL)

Fog
Heavy Rain
Very Heavy Rain
Extremely Heavy Rain
Thunder & Lightning
Hailstorm
Dust Raising Winds
Heavy Snow
Dust Storm
Heat Wave
Warm Night
Hot Day
Hot & Humid
Strong Surface Winds
Cold Wave
Cold Day
Ground Frost

COLOUR CODED WARNING

- No Warning (No Action)
- Watch (Be Aware)
- Alert (Be Prepared To Take Action)
- Warning (Take Action)

Probabilistic Forecast

Terms	Probability of Occurrence (%)
Unlikely	< 25
Likely	25 - 50
Very Likely	50 - 75
Most Likely	> 75

* Red colour warning does not mean "Red Alert", Red colour warning means "Take Action".
Forecast and Warning for any day is valid from 0830 hours IST of day till 0830 hours IST of next day.

DEFINITION/CRITERIA

Rain/ Snow *

- **Heavy:** 64.5 to 115.5 mm/cm *
- **Very Heavy:** 115.6 to 204.4 mm/cm*
- **Extremely Heavy:** > 204.4 mm/cm *

Heat Wave

When maximum temperature of a station reaches ≥40° C for plains and ≥30° C for hilly regions

(a) Based on Departure from normal

- **Heat Wave:** Maximum Temperature Departure from normal 4.5° C to 6.4° C.
- **Severe Heat Wave:** Maximum Temperature Departure from normal ≥6.5° C

(b). Based on Actual maximum temperature

- **Heat Wave:** When actual maximum temperature ≥45°C.
- **Severe Heat Wave:** When actual maximum temperature ≥47°C

(c). Criteria for heat wave for coastal stations

When maximum temperature departure is >4.5°C from normal. Heat Wave may be described provided maximum temperature ≥37°C

Warm Night

When maximum temperature remains 40°C

- **Warm Night:** When minimum temperature departure 4.5 °C to 6.4 °C.
- **Severe Warm Night:** When minimum temperature departure >6.4 °C.

Cold Wave

When minimum temperature of a station ≤10°C for plains and ≤0°C for hilly regions.

(a). Based on departure

- **Cold Wave:** Minimum Temperature Departure from normal -4.5 °C to -6.4 °C.
- **Severe Cold Wave:** Minimum Temperature Departure from normal ≤ -6.5 °C

(b) Based on actual Minimum Temperature (for Plains only)

- **Cold Wave :** When Minimum Temperature is ≤ 4.0 °C
- **Severe Cold Wave:** When Minimum Temperature is ≤ 2.0 °C

(c) For Coastal Stations

When Minimum Temperature departure is ≤-4.5 °C & actual Minimum Temperature is ≤ 15 °C

Cold Day

When minimum temperature of a station ≤10°C for plains and ≤0°C for hilly regions

Based on departure

- **Cold Day:** Maximum Temperature Departure from normal -4.5 °C to -6.4 °C.
- **Severe Cold Day:** Maximum Temperature Departure from normal ≤ -6.5 °C

Fog

Phenomenon of small droplets suspended in air and the horizontal visibility < 1km

- **Moderate Fog:** When the visibility between 500-200 metres
- **Dense Fog:** when the visibility between 50- 200 metres
- **Very Dense Fog:** when the visibility < 50 metres

Thunderstorm

Sudden electrical discharges manifested by a flash of light (Lightning) and a sharp rumbling sound (thunder)

Dust/Sand Storm

An ensemble of particles of dust or sand energetically lifted to great heights by a strong and turbulent wind.

Frost

Ice deposits on ground

- Air temperature ≤4°C (over Plains)

Squall

A strong wind that rises suddenly, lasts for atleast 1 minute.

- **Moderate**: Wind speed 52-61 kmph
- **Severe**: Wind speed 62-87 kmph
- **Very Severe**: Wind speed >87 kmph

Sea State

Effect of various waves in the sea over specific area

- **Rough to very rough**: Wind speed 41-62 kmph (22-33 knots) & Wave height 2.5-6 metre
- **High to very high**: Wind speed 63-117 kmph (34-63 knots) & Wave height 6-14 metre
- **Phenomenal**: Wind speed >117 kmph (>63 knots) & Wave height >14 metre

Cyclone

- **Cyclonic Storm**: Wind speed 62-87 kmph (34-47 knots)
- **Severe Cyclonic Storm**: Wind speed 88-117 kmph (48-63 knots)
- **Very Severe Cyclonic Storm**: Wind speed 118-165 kmph (64 - 89 knots)
- **Extremely Severe Cyclonic Storm**: Wind speed 166-220 kmph (90 -119 knots)
- **Super Cyclone Strom**: Wind speed >220 kmph (>119 knots)

* Red colour warning does not mean "Red Alert", Red colour warning means "Take Action".

Forecast and Warning for any day is valid from 0830 hours IST of day till 0830 hours IST of next day.
