चेतावनी मानचित्र
जारी दिनांक : 23 August 2025

1. Karauli

Thunderstorm / Lightning				
District	Crop	Stage	Likely Impact on crop	Advisory
Karauli	Cluster bean	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Green gram	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Sesame	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Pearl millet	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Vegetables	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray

वेबसाइट: http://rmcnewdelhi.imd.gov.in/MET_CENTRES/MCJPR/, <https://mausam.imd.gov.in/jaipur/>

मौसम केंद्र जयपुर, फ़ोन: 0141-2988121, 2790194, ईमेल: agrometmciaipur@gmail.com

Heavy Rains				
District	Crop	Stage	Likely Impact on crop	Advisory
Karauli	Cluster bean	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Greengram	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Sesame	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Pearlmillet	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Vegetables	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.

2. Dholpur

Thunderstorm / Lightning				
District	Crop	Stage	Likely Impact on crop	Advisory
Dholpur	Cluster bean	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Green gram	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Sesame	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Pearl millet	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray
	Vegetables	Vegetative	No negative impact on crop	Don't apply irrigation and any chemical spray

Heavy Rains				
District	Crop	Stage	Likely Impact on crop	Advisory
Karauli	Cluster bean	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Greengram	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Sesame	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Pearlmillet	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Vegetables	Flowering	Crop submerged or damage, fungal infection (Root and shoot disease)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.

3. DUNGARPUR AND BANSWARA

Thunderstorm / Lightening				
District	Crop	Stage	Likely Impact on crop	Advisory

वेबसाइट: http://rmcnewdelhi.imd.gov.in/MET_CENTRES/MCJPR/, <https://mausam.imd.gov.in/jaipur/>

मौसम केंद्र जयपुर, फ़ोन: 0141-2988121, 2790194, ईमेल: agrometmcjaipur@gmail.com

Banswara & Dungarpur	Maize	Germination	Poor Germination	Provide irrigation for better moisture for better germination.
	Cotton	Germination	Poor germination	Provide irrigation for better moisture for better germination
	Soybean	Germination	Poor germination	Provide irrigation for better moisture for better germination.
	Vegetables	Flowering and Fruiting	To protect from shattering & getting wet	Keeping in view the possibility of light drizzle & thunderstorm, farmers should be cover the harvested crop and keep it safer place to protect from getting wet.
	Mango	Fruit maturity and harvesting	To protect from shattering of fruits & getting wet	Farmers advised that, keeping in view the possibility of light drizzle & thunderstorm/lightening, farmers should be cover the fruits and keep it safer place to protect from getting wet.
	Animals		Possibility of lightening.	Tie the animals in safer place and covered area.

Heavy Rains				
District	Crop	Stage	Likely Impact on crop	Advisory
Banswara & Dungarpur	Maize	Sowing	Water Logging due to excess rainfall	Only if excess rainfall occurs, postpone the sowing for 2-3 days till field comes under condition.
	Cotton	Germination	Poor germination	Check proper drainage for removal of excess water which will help in better germination
	Soybean	germination	Poor germination	Check proper drainage for removal of excess water which will help in better germination of soybean.
	Vegetable crops (Bottle Gourd, Cucurbits, Okra, Clusterbean etc.)	Flowering and Fruiting	Plant damage, lodging, Flower & fruit dropping	Keeping in view the possibility of heavy rains, do not apply irrigation and drainage the excess water.
	Mango	Fruit maturity	Fruit Dropping	Farmers should be cover the harvested mango fruit and keep it safer place to protect.
	Animals		To protect from gusty winds	Keeping in view the possibility of dust storm, farmers should be cover the animals and keep it safer place to protect.

4. KOTA, BUNDI, BARAN AND JHALAWAR

Thunderstorm / lightening				
District	Crop	Stage	Likely Impact on crop	Advisory
Kota, Bundi, Baran & Jhalawar	Rice	Transplanting & Nursery	No impact on crop	In condition of thunderstorm / lightening do not apply irrigation, spray of weedicides / insecticides and fertilizers.
	Black gram	Flowering	Crop submerged or damage, fungal infection (Root and shoot)	Drainage excess water and maintain soil moisture and don't apply irrigation and chemical spray.
	Vegetables	Flowering	Crop submerged or damage, fungal infection (Root and shoot)	Drainage excess water and maintain soil moisture and don't apply irrigation and chemical spray.

वेबसाइट: http://rmcnewdelhi.imd.gov.in/MET_CENTRES/MCJPR/, <https://mausam.imd.gov.in/jaipur/>

मौसम केंद्र जयपुर, फ़ोन: 0141-2988121, 2790194, ईमेल: agrometmcjaipur@gmail.com

	Maize	Flowering	Due to excess moisture in the maize crop, symptoms of stem rot disease.	Make provision to drain out excess water during heavy rainfall.
	Soya bean	vegetative stage	Crop submerged or damage, fungal infection (Root and shoot)	Make provision to drain out excess water during heavy rainfall. Spraying of fertilizers and chemical spraying should be postponed.
	Sesame	Flowering	Crop submerged or damage, fungal infection (Root and shoot)	Don't apply irrigation. Spray & fertilization. Make provision to drain out excess water during heavy rainfall.
	Green gram	Flowering	Crop submerged or damage, fungal infection (Root and shoot)	Don't apply irrigation. Spray & fertilization. Drainage excess of water.
	Buffalo		Possibility of Lightening.	Tie the animals in safer place and covered area to protect the animals from getting wet.

Heavy Rains				
District	Crop	Stage	Likely Impact on crop	Advisory
Kota, Bundi, Baran & Jhalawar	Rice	Nursery seedling to transplanting stage	Water stagnation	Make provision to drain out excess water from nursery during heavy rainfall. • Raise the bunds in main field to conserve water for transplanting.
	Black gram	Vegetative	Submerged and chance of root and shoot disease occurring	Drainage excess water and maintain soil moisture and don't apply irrigation and chemical spray.
	Vegetables	Vegetative	Submerged and chance of root and shoot disease occurring	Drainage excess water and maintain soil moisture and don't apply irrigation and chemical spray.
	Maize	vegetative stage	Rotting of root	Make provision to drain out excess water during heavy rainfall.
	Soya bean	vegetative stage	Submerged and chance of root and shoot disease occurring	Make provision to drain out excess water during heavy rainfall. Spraying of fertilizers and chemical spraying should be postponed.
	Buffalo			Animal sheds should be kept as dry as possible.

5. SIKAR AND JHUNJHUNU

Thunderstorm / Lightening				
District	Crop	Stage	Likely Impact on crop	Advisory
Sikar	Groundnut	Pegging and pod formation	Lightning cause rapid wilting of plants or stems, browning of leaves and poor peg and pod formation	
	Pearl millet	Vegetative	Lightning cause browning or blackening of leaves	Postpone irrigation and spray
	Clusterbean, Cowpea, Greengram	Vegetative	Lightning cause browning or blackening of leaves	Postpone irrigation and spray
	Cucurbits (Round gourd, Bottle gourd etc)	Flowering and fruiting	Immature dropping of flowers and fruits	Timely picking of proper ripen fruits

वेबसाइट: http://rmcnewdelhi.imd.gov.in/MET_CENTRES/MCJPR/, <https://mausam.imd.gov.in/jaipur/>

मौसम केंद्र जयपुर, फ़ोन: 0141-2988121, 2790194, ईमेल: agrometmcjaipur@gmail.com

6. JODHPUR

Thunderstorm / Lightning				
District	Crop	Stage	Likely Impact on crop	Advisory
Jodhpur	Kharif Pulses	Vegetative	Poor germination and plant establishment	Postpone irrigation this period
	Pearl millet	Vegetative	Damage of stem and leaves	Postpone irrigation this period
	Groundnut	Vegetative	Damage of stem and leaves	Postpone irrigation this period
	Cotton	Vegetative	Damage of stem and leaves	Postpone irrigation this period
	Vegetables	Flowers & fruits	Damage of fruits and tender branch	Timely pick up vegetables fruits and don't apply irrigation

Heavy Rains				
District	Crop	Stage	Likely Impact on crop	Advisory
Jodhpur	Kharif Pulses	Vegetative	Poor plant establishment and water lodging	Make arrangement for drainage and remove extra water from fields
	Pearl millet	Vegetative	Poor plant establishment and water lodging	Make arrangement for drainage and remove extra water from the fields
	Groundnut	Vegetative	Damage of plant & fungal infection	Make arrangement for drainage and remove extra water from the fields
	Cotton	Vegetative	Poor plant establishment	Make arrangement for drainage and remove extra water from the fields
	Vegetables	Flowers & fruits	Lodging and damping	Make arrangement for drainage and remove extra water from the fields

7. SIROHI

Thunderstorm / Lightning				
District	Crop	Stage	Likely Impact on crop	Advisory
Sirohi	Cluster Bean	Vegetative	Defoliation and breaking of stem	It is always advisable to have shelter belt and wind breaks around field.
	Sesamum	Seedling	Defoliation and breaking of stem	It is always advisable to have shelter belt and wind breaks around field.
	Green Gram	Germination to Bud emergence	Defoliation and breaking of stem	It is always advisable to have shelter belt and wind breaks around field.
	Pomegranate	Early flowering	Defoliation and breaking of stem	It is always advisable to have shelter belt and wind breaks around orchard.
	Papaya	Fruit	Fruit dropping	Use shelter belt and wind breaks
		Harvesting		Cover the newly planted fruit plant

वेबसाइट: http://rmcnewdelhi.imd.gov.in/MET_CENTRES/MCJPR/, <https://mausam.imd.gov.in/jaipur/>

मौसम केंद्र जयपुर, फ़ोन: 0141-2988121, 2790194, ईमेल: agrometmcjaipur@gmail.com

Heavy Rains				
District	Crop	Stage	Likely Impact on crop	Advisory
Sirohi	Cluster Bean	Vegetative	Water stagnation and could be a plant death	Make arrangement for drainage and remove extra water from crop field to make proper aeration in soil. Conserve runoff water or extra water in farm pond for future use. Recharge well and tubewell from runoff or extra water
	Sesamum	Seedling	Water stagnation and could be a plant death	Make arrangement for drainage and remove extra water from crop field to make proper aeration in soil. Conserve runoff water or extra water in farm pond for future use. Recharge well and tubewell from runoff or extra water
	Green Gram	Germination to Bud emergence	Water stagnation and could be a plant death	Make arrangement for drainage and remove extra water from crop field to make proper aeration in soil. Conserve runoff water or extra water in farm pond for future use. Recharge well and tubewell from runoff or extra water
	Pomegranate	Early flowering	Water stagnation and could be a plant death	Make arrangement for drainage and remove extra water from crop field to make proper aeration in soil. Conserve runoff water or extra water in farm pond for future use. Recharge well and tubewell from runoff or extra water
	Lime	Fruit Harvesting	Yellowing leaves and could be a sudden death due to oxygen deficiency in the soil	Make arrangement for drainage and remove extra water from the field
	Papaya	Fruit Harvesting	Yellowing leaves and could be a sudden death due to oxygen deficiency in the soil	Make arrangement for drainage and remove extra water from the field

Very Heavy Rains				
District	Crop	Stage	Likely Impact on crop	Advisory
Sirohi	Cluster Bean	Vegetative	Water stagnation and could be a plant death	Make arrangement for drainage and remove extra water from crop field to make proper aeration in soil. Conserve runoff water or extra water in farm pond for future use. Recharge well and tubewell from runoff or extra water
	Sesamum	Seedling	Water stagnation and could be a plant death	Make arrangement for drainage and remove extra water from crop field to make proper aeration in soil. Conserve runoff water or extra water in farm pond for future use. Recharge well and tubewell from runoff or extra water

कृषि पर मौसम की चेतावनी का संभावित प्रभाव व संबंधी सलाह

कृषि में आंधी और बिजली गिरने पर क्या करें और क्या न करें

क्या करें

- तेज हवाओं के साथ आंधी आने की संभावना को देखते हुए, बगीचों को यांत्रिक सहायता प्रदान करें, सब्जियाँ लगाएँ।
- अगर किसान खेत में हैं और उन्हें कोई आश्रय नहीं मिल रहा है, तो इलाके में सबसे ऊँची वस्तु से दूर रहें। अगर आस-पास सिर्फ़ एकाकी पेड़ हैं, तो सबसे बेहतर बचाव खुले में छिपना है।
- जानवरों को खुले पानी, तालाब या नदी से दूर रखें।
- जानवरों को ट्रैक्टर और दूसरे धातु के कृषि उपकरणों से दूर रखें।
- खड़ी फसलों से अतिरिक्त पानी निकाल दें।
- कटी हुई उपज (अगर खेत में है) को पॉलीथीन शीट से ढक दें।

क्या न करें

- बिजली के उपकरणों या तारों के संपर्क से बचें।
- धातु से बनी किसी भी चीज़ - ट्रैक्टर, कृषि उपकरण और साइकिल - के संपर्क से दूर रहें। धातु या दूसरी सतहें जो बिजली का संचालन करती हैं।
- अपने जानवरों को पेड़ों के नीचे इकट्ठा न होने दें। अपने पशुओं पर कड़ी नजर रखें और उन्हें अपने प्रत्यक्ष नियंत्रण में रखने का प्रयास करें।
