Special message regarding likely formation of Low Pressure Area over Bay of Bengal

As per various numerical model guidance, an upper air circulation is likely to form over South Andaman Sea and adjoining areas around 21st November. Under its influence, a **Low Pressure Area** is likely to form over Southeast Bay of Bengal around 23rd November. Thereafter, it is likely to move west-northwestwards and concentrate into a **Depression** over Southwest Bay of Bengal during subsequent two days.

A continuous watch is being maintained for further intensification and movement of the system towards Tamilnadu-Sri Lanka coasts.
