**Agromet advisories for likely impact of Hailstorm / Heavy Rainfall / Gusty Winds / Heat wave**  
(Based on the IBF and advisories issued by different AMFUs)

- In **Odisha, Kerala and South Interior Karnataka**, make provision to drain out excess water from standing crop and vegetable fields.
- In **Sub Himalayan West Bengal and Sikkim, Odisha, Bihar, Uttarakhand, East Uttar Pradesh, Chhattisgarh and East Madhya Pradesh**, use hail nets and hail caps to prevent mechanical damage in vegetables and orchards due to the possibility of hailstorms.
- To protect standing crops, vegetables and orchards from the adverse effects of heat waves and high temperatures, apply light and frequent irrigation in the evening.
- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops properly and cover them to minimise the risk of displacement due to strong surface winds.
- Provide mechanical support to horticultural crops and staking to vegetables to avoid lodging.

**Livestock / Poultry / Fishery**

- Keep the animals inside the shed during heavy rainfall / hailstorm and provide them balanced feed.
- Store feed and fodder in a safe place to prevent spoilage.
- To reduce the effect of heat wave/high temperature, cover the roof of poultry sheds with grass. Also, provide clean, hygienic and plenty of drinking water to animals.
- Construct an outlet with proper netting around the ponds to drain out excess water, thereby preventing fish from escaping in case of overflow.
