

ALL INDIA WEATHER SUMMARY AND FORECAST BULLETIN

Significant Weather Features

Weather Forecast and warning:

- Light/moderate scattered to fairly widespread rainfall/snowfall likely over Jammu-Kashmir-Ladakh-Gilgit-Baltistan-Muzaffarabad, Himachal Pradesh and isolated rainfall/snowfall over Uttarakhand during 16th-20th January and isolated rainfall over Punjab, Haryana, Chandigarh during 18th - 20th and over West Uttar Pradesh and East Rajasthan on 19th & 20th January.
- Light/moderate rainfall at many places accompanied with thunderstorm, lightning likely over Lakshadweep on 14th January.

Forecast of minimum temperatures:

- Gradual rise in minimum temperatures likely over northwest India during next 5 days and thereafter no significant change for subsequent 2 days.
- No significant change in minimum temperatures likely over Central India during next 3 days; gradual rise by 2-4°C during subsequent 4 days.
- No significant change in minimum temperatures likely over East India during next 4 days; gradual rise by 2-3°C during subsequent 3 days.
- No significant change in minimum temperatures likely over Maharashtra during next 24 hours; gradual fall by 2-3°C during subsequent 2 days and thereafter gradual rise by 2-3°C during subsequent 4 days.
- No significant change in minimum temperatures likely over Gujarat State during next 24 hours and gradual rise by 2-3°C during subsequent 2 days and no significant change thereafter for subsequent 4 days.
- No significant change in minimum temperatures likely over rest parts of the country.

Dense Fog, Cold day & Cold wave Warnings:

- **Dense to very dense fog** conditions very likely to prevail in morning/night hours in isolated/some parts over Uttarakhand, Punjab, Haryana Chandigarh & Delhi till 16th and **Dense fog** in isolated pockets till 19th January 2026.
- **Dense to very dense fog** conditions very likely to prevail in morning/night hours in isolated/some parts West Uttar Pradesh till 19th and **Dense fog** in isolated pockets till 21st January 2026.
- **Dense to very dense fog** conditions very likely to prevail in morning/night hours in isolated/some parts over East Uttar Pradesh during 16th -19th; **Dense fog** in isolated pockets on 15th, 20th & 21st January 2026.
- **Dense fog** conditions also likely during morning/night hours in isolated pockets over Jammu division, Himachal Pradesh till 16th; West Rajasthan till 15th; Sub-Himalayan West Bengal & Sikkim during 15th -19th; Bihar till 21st; Gangetic West Bengal during 16th -19th; Assam & Meghalaya till 18th January.
- **Cold day to severe cold day** conditions likely in isolated pockets of Punjab, Haryana & Chandigarh on 14th and **Cold day** conditions on 15th January.
- **Cold wave to Severe Cold wave** conditions very likely in some/many parts of Haryana, Chandigarh on 15th and **Cold wave conditions** in isolated pockets on 16th January.
- **Cold wave conditions** very likely in isolated pockets over Himachal Pradesh, Uttarakhand, Punjab, Rajasthan, Chhattisgarh and Jharkhand on 15th & 16th; West Uttar Pradesh & Delhi on 15th; Odisha during 15th-17th January.

*Red color warning does not mean "Red Alert" Red color warning means "Take Action"

Forecast and warning for any day is valid from 0830 hours IST of day till 0830 hours IST of next day

For more details kindly visit <https://mausam.imd.gov.in> or contact 011-2434-4599

(Service to the nation since 1875)

Main Weather Observations:

❖ **Rainfall distribution** (from 0830 hours IST of yesterday to 0830 hours IST of today): **at many places** over Kerala & Mahe; **at a few places** over Tamil Nadu, Puducherry & Karaikal; **at isolated places** over Madhya Maharashtra, Marathwada, Coastal Karnataka, North Interior Karnataka and South Interior Karnataka; **Dry** over rest of the country.

❖ **Significant rainfall recorded(in cm)** (from 0830 hours IST of yesterday to 0830 hours IST of today): **Tamil Nadu, Puducherry & Karaikal:** Oothu (dist Tirunelveli) 9; Kakkachi (dist Tirunelveli), Nalumukku (dist Tirunelveli) 7 Each; Illayangudi (dist Sivaganga), Manjolai (dist Tirunelveli) 5 Each; **Kerala & Mahe:** Chemberi AWS (dist Cannur) 6; Quilandi (dist Kozhikode), Irikkur (dist Cannur) 5 Each; **South Interior Karnataka:** Balehonnur (dist Chikkamagaluru) 5.

❖ **Heavy Rainfall observed** (from 0830 hours IST of yesterday to 0830 hours IST of today): **Heavy rain** at isolated places over Tamil Nadu, Puducherry & Karaikal.

❖ **Fog Condition Observed (at 0830 hours of today):** **Dense to very Dense fog conditions** prevailed in most parts of Punjab; in many parts of Haryana; in some parts of Uttarakhand; and in isolated pockets of Jammu-Kashmir, West Rajasthan & West Uttar Pradesh; **Dense fog** conditions prevailed in isolated pockets of Tripura, Bihar, Himachal Pradesh & Chandigarh.

❖ **Visibility reported (at 0830 hours of today):** **Jammu-Kashmir:** Jammu(50) & Udhampur(0); **Uttarakhand:** Pantnagar (0), Haridwar/Roorkee/Kashipur/Laksar/Bhagwanpur (20), Roshnabad (30), Khatima (<50); **Punjab:** Amritsar (0), Bathinda(<50), Faridkot(<50), Ballawal Saunkri (50); Patiala (70), Gurdaspur (100); **Haryana & Chandigarh:** Ambala (00); Hisar (20), Bhiwani (20); Karnal (30), Chandigarh (60); **West Uttar Pradesh:** Bareilly IAF, Hindon IAF & Sarsawa(IAF)-(00), Bareilly(20), Shahjahanpur(30), Ams Moradabad & Najibabad(50) Each, Muzaffarnagar(100), Aligarh(150); **West Rajasthan:** Sri Ganganagar(50); **Himachal Pradesh:** Una (50); **Tripura:** Agartala(50).

- **Cold wave to severe cold wave conditions** prevailed in some parts of Himachal Pradesh and Haryana & Chandigarh; in isolated pockets of West Rajasthan and **Cold wave conditions** in some places over Jharkhand and in isolated pockets of Punjab, West Uttar Pradesh, East Rajasthan, Odisha.
- **Severe Cold day conditions** prevailed in isolated pockets of Punjab.
- **Ground frost conditions** have been recorded in isolated pockets over Uttarakhand.
- **Heavy rainfall (7-11 cm)** has been recorded at isolated places over Tamil Nadu.

❖ **Minimum Temperature Departures (as on 14-01-2026):** were below normal (-3°C to -6°C) over Jammu-Kashmir, Haryana, Chandigarh & Delhi, Uttar Pradesh, Chhattisgarh, Odisha, Saurashtra & Kutch, Jharkhand & Bihar and near normal over rest parts of the country.. **The lowest minimum temperature** of 0.5°C is reported at HISSAR (HARYANA) over the Plains of India.

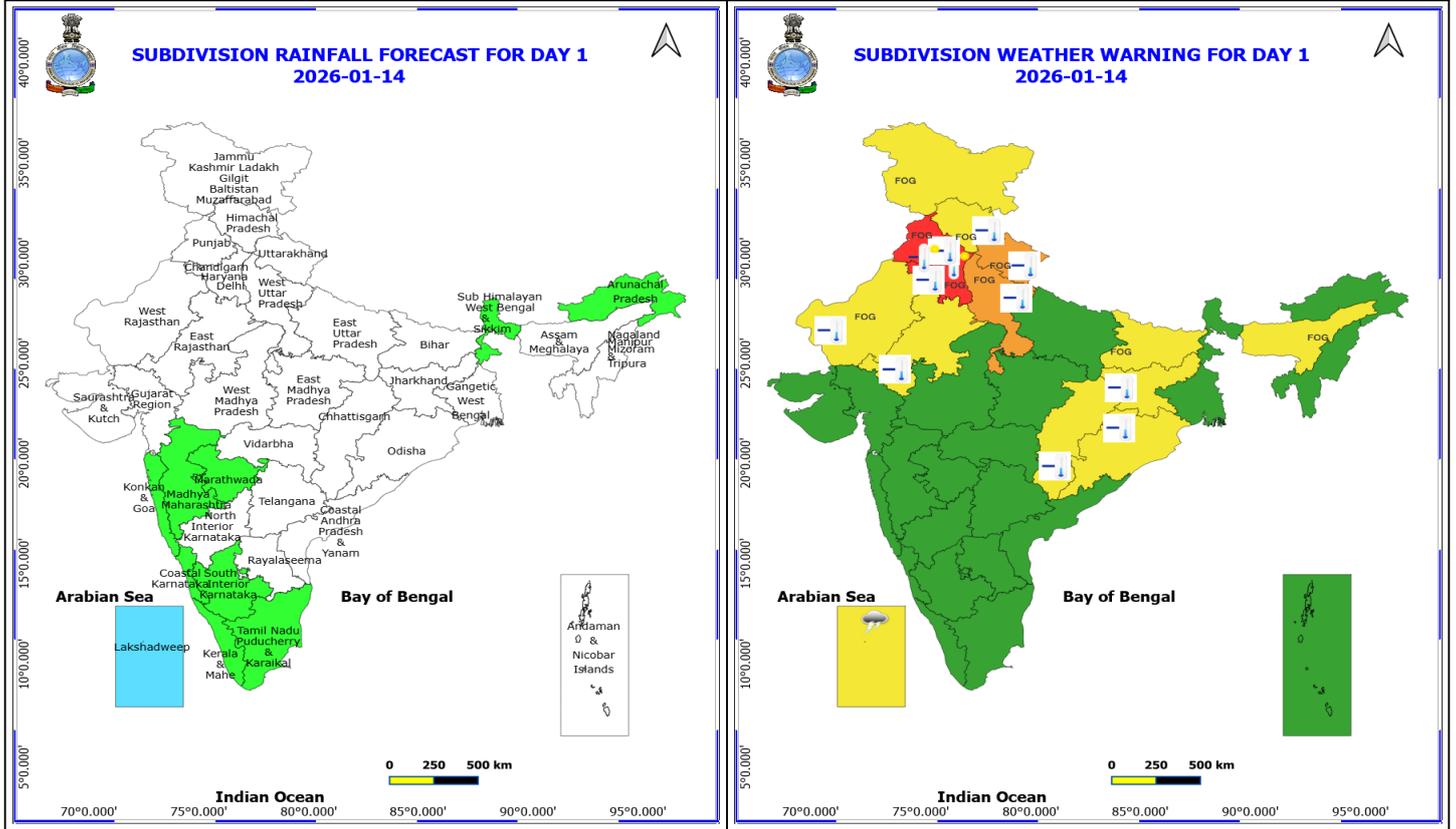

❖ **Maximum Temperature Departures (as on 13-01-2026):** **below normal(-1.6°C to -3.0°C)** at isolated places over Punjab. **appreciably below normal(-5.0°C to -3.1°C)** at isolated places over Himachal Pradesh. **The highest maximum temperature** of 35.8°C is reported at KARWAR (KARNATAKA).

Meteorological Analysis (Based on 0830 hours IST)

- Conditions are becoming favourable for cessation of **Northeast monsoon** rains over Tamilnadu, Puducherry & Karaikal, Kerala & Mahe and adjoining areas of Coastal Andhra Pradesh & Yanam, Rayalaseema and South Interior Karnataka during next 3 days.
- **Subtropical westerly Jet Stream** with core winds of the order of 110 knots at 12.6 km above mean sea level prevails over northeast India.
- The **trough** in middle and upper tropospheric westerlies with its axis at 5.8 km above mean sea level now runs roughly between Long. 74°E/ Lat. 28°N to Long. 73°E / Lat. 20°N.
- A fresh **Western disturbance** is likely to affect Western Himalayan region from 16th January, 2026.
- The **Western Disturbance** as a **cyclonic circulation** over Himachal Pradesh and neighbourhood at 3.1km above mean sea level has become less marked.
- The **upper air cyclonic circulation** over northwest Uttar Pradesh at 0.9 km above mean sea level has become less marked.

Weather Outlook for subsequent 3 days

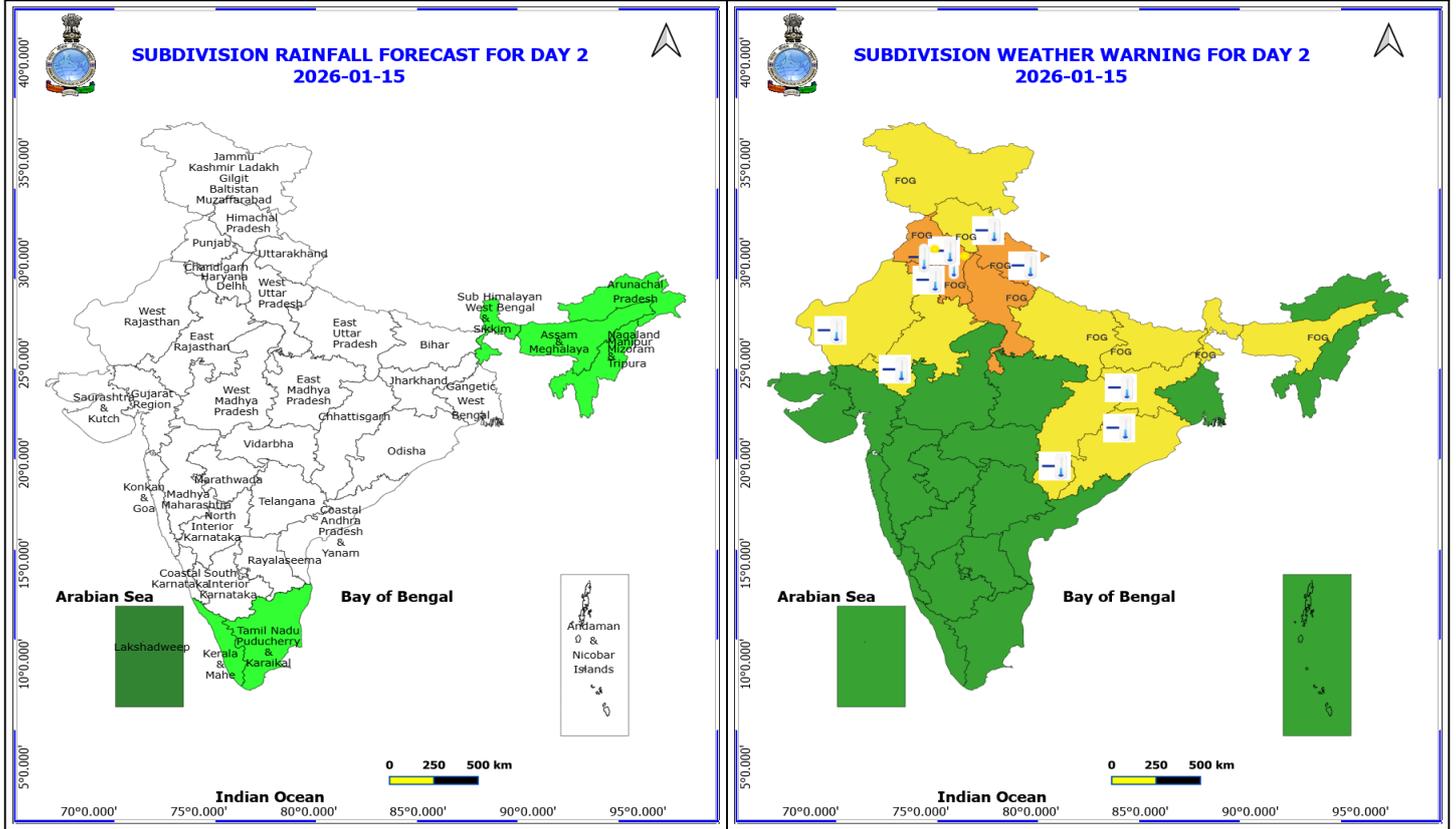

- Scattered to Fairly widespread activity likely over Western Himalayan Region, Plains of northwest India except Rajasthan And Madhya Pradesh where isolated/scattered rainfall activity is likely.
- Isolated rainfall activity is likely over Kerala, Lakshadweep and Nicobar islands.

14 January (Day 1)

- ❖ **Thunderstorm accompanied with Lightning** very likely at isolated places over Lakshadweep.
- ❖ **Cold wave conditions** very likely at isolated places over Chhattisgarh, Himachal Pradesh, Jharkhand, Odisha, Punjab, Rajasthan, Uttarakhand and West Uttar Pradesh.
- ❖ **Cold wave to Severe Cold wave conditions** very likely at isolated places over Haryana, Chandigarh & Delhi.
- ❖ **Cold Day to Severe Cold Day conditions** very likely at isolated places over Haryana, Chandigarh & Delhi and Punjab.
- ❖ **Dense Fog** very likely at isolated places over Assam & Meghalaya, Bihar, Himachal Pradesh, Jammu-Kashmir-Ladakh-Gilgit-Baltistan-Muzaffarabad and West Rajasthan.
- ❖ **Dense to Very Dense Fog** very likely at isolated places over Haryana, Chandigarh & Delhi, Punjab, Uttarakhand and West Uttar Pradesh.

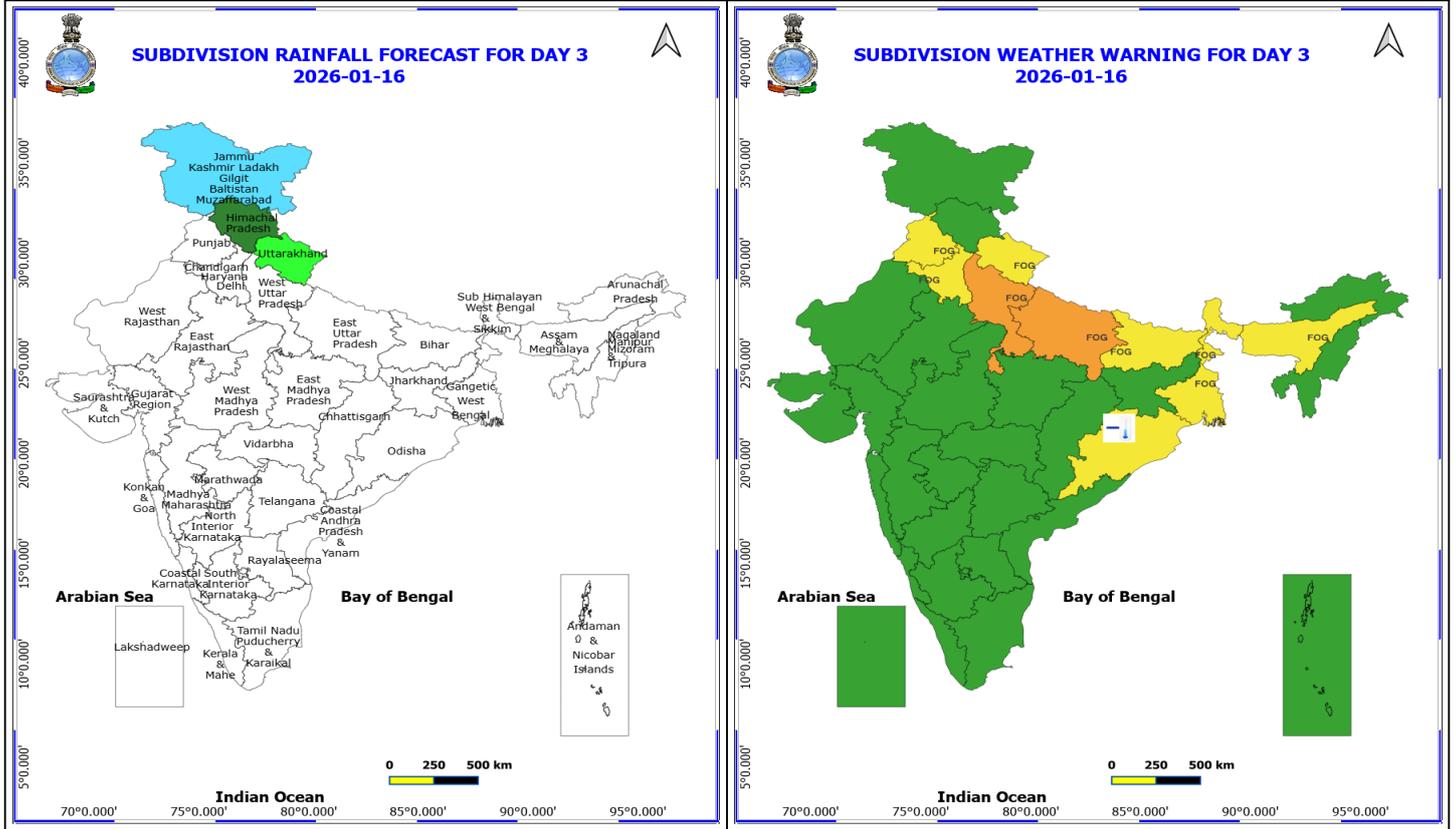

No Warning.

15 January (Day 2)

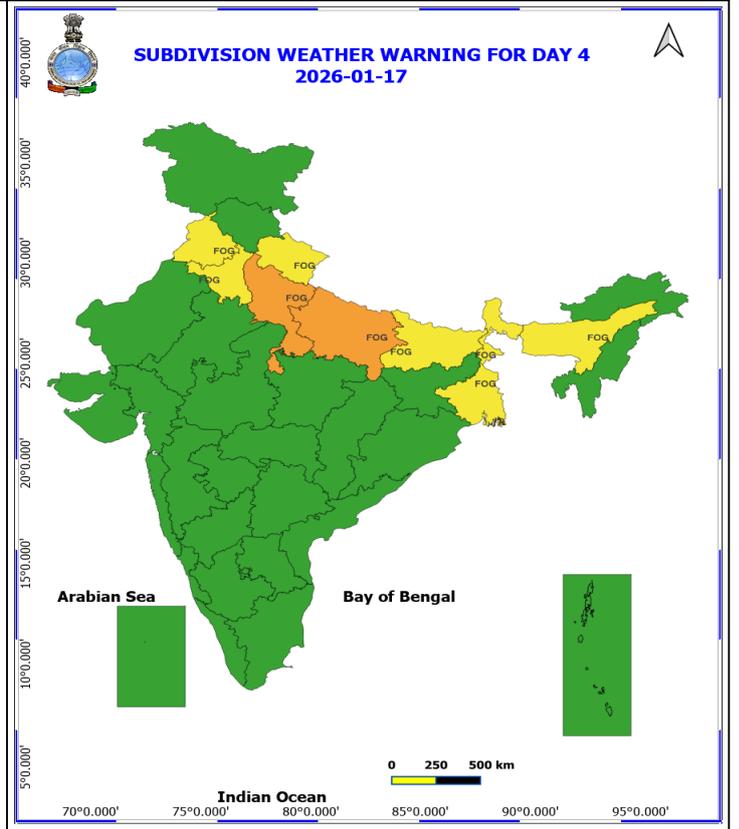

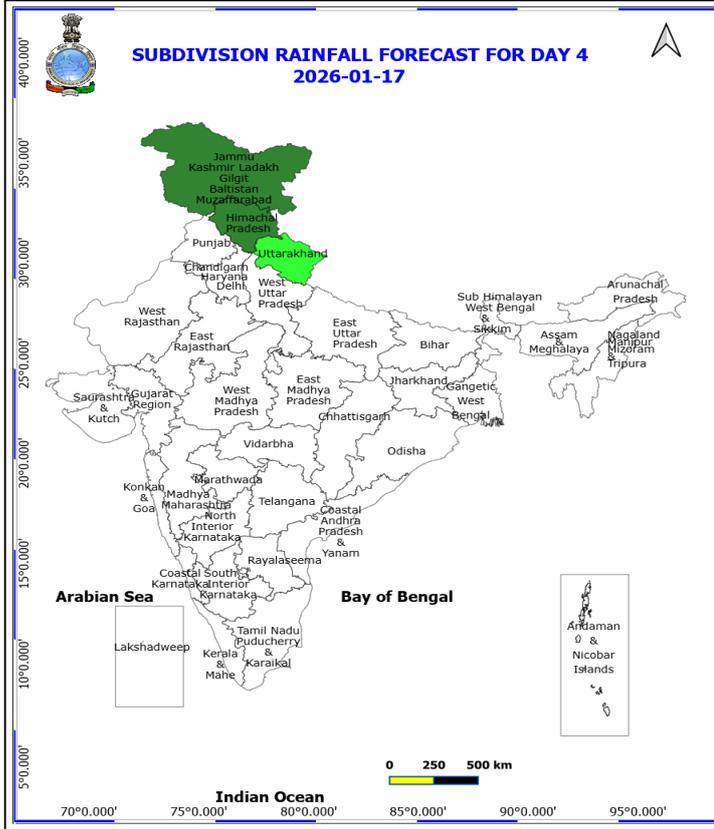

- ❖ **Cold wave conditions** very likely at isolated places over Chhattisgarh, Haryana, Chandigarh & Delhi, Himachal Pradesh, Jharkhand, Odisha, Punjab, Rajasthan and Uttarakhand.
- ❖ **Cold Day conditions** very likely at isolated places over Haryana, Chandigarh & Delhi and Punjab.
- ❖ **Dense Fog** very likely at isolated places over Assam & Meghalaya, Bihar, East Uttar Pradesh, Himachal Pradesh, Jammu-Kashmir-Ladakh-Gilgit-Baltistan-Muzaffarabad and Sub Himalayan West Bengal & Sikkim.
- ❖ **Dense to Very Dense Fog** very likely at isolated places over Haryana, Chandigarh & Delhi, Punjab, Uttarakhand and West Uttar Pradesh.

No Warning.

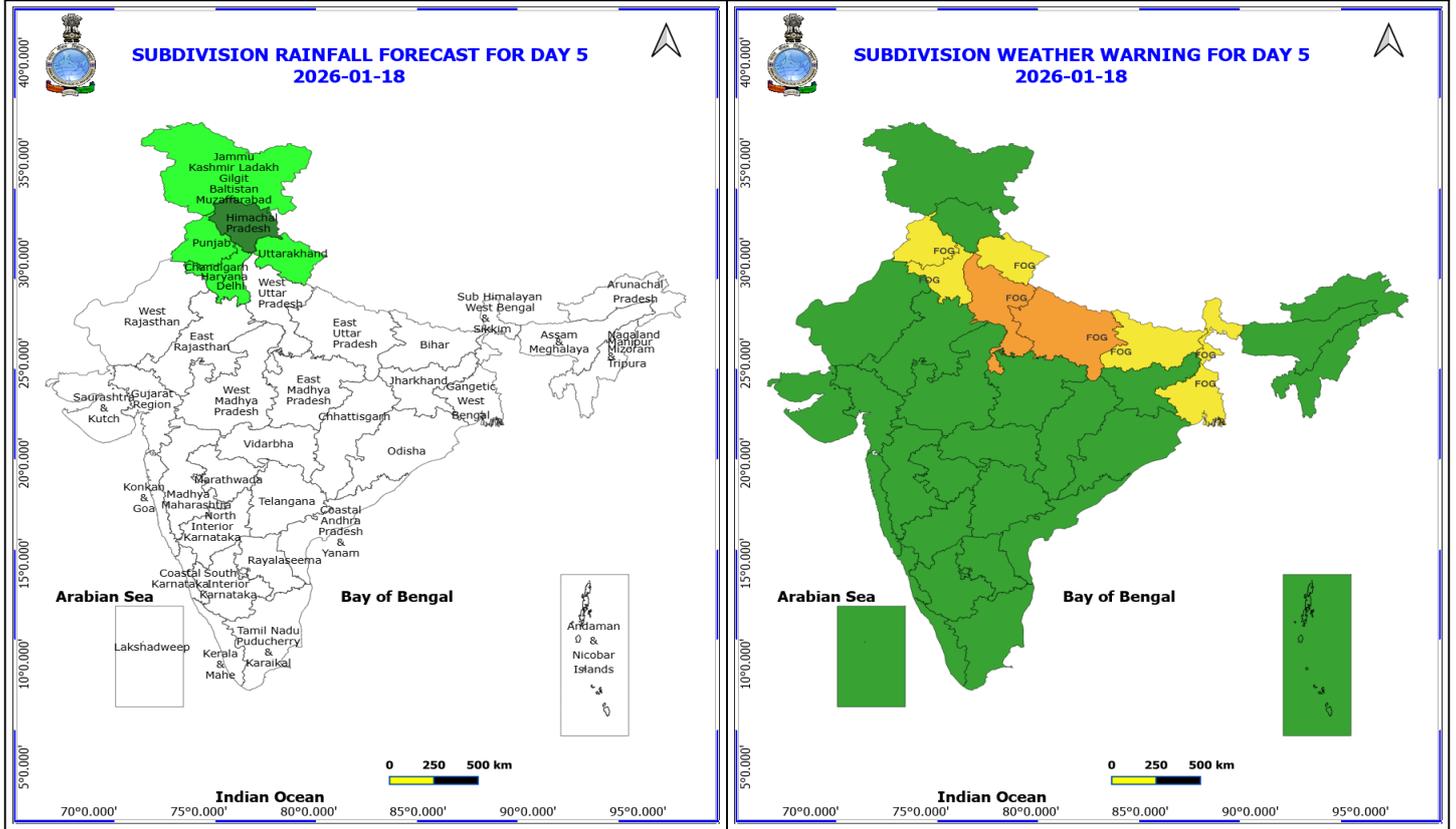

16 January (Day 3)

- ❖ **Cold wave conditions** very likely at isolated places over Odisha.
 - ❖ **Dense Fog** very likely at isolated places over Assam & Meghalaya, Bihar, Haryana, Chandigarh & Delhi, Punjab, Uttarakhand and West Bengal & Sikkim.
 - ❖ **Dense to Very Dense Fog** very likely at isolated places over Uttar Pradesh.
- No Warning.

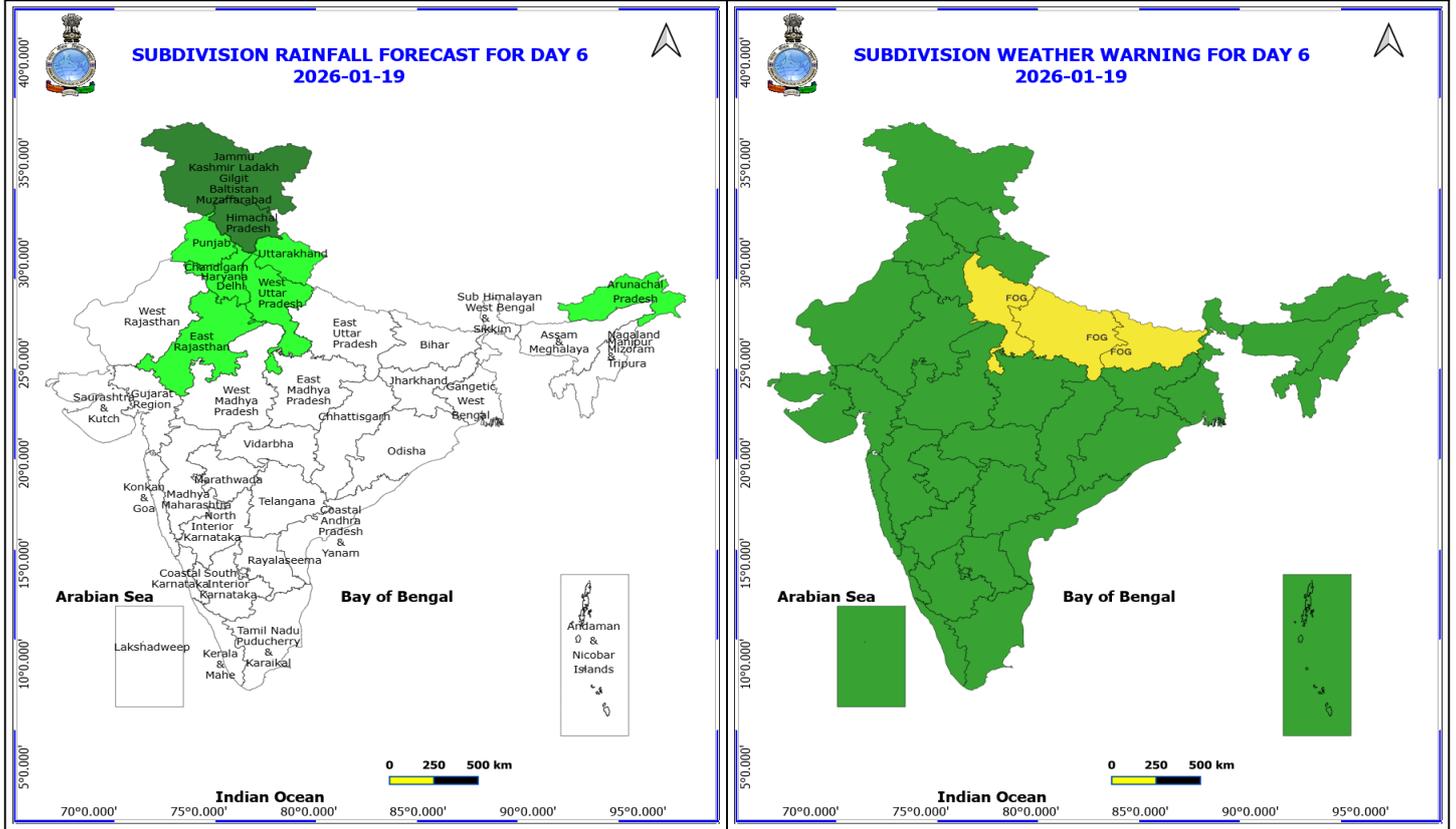

17 January (Day 4)

- ❖ **Dense Fog** likely at isolated places over Assam & Meghalaya, Bihar, Haryana, Chandigarh & Delhi, Punjab, Uttar Pradesh and West Bengal & Sikkim.
 - ❖ **Dense to Very Dense Fog** likely at isolated places over Uttar Pradesh.
- No Warning.

18 January (Day 5)

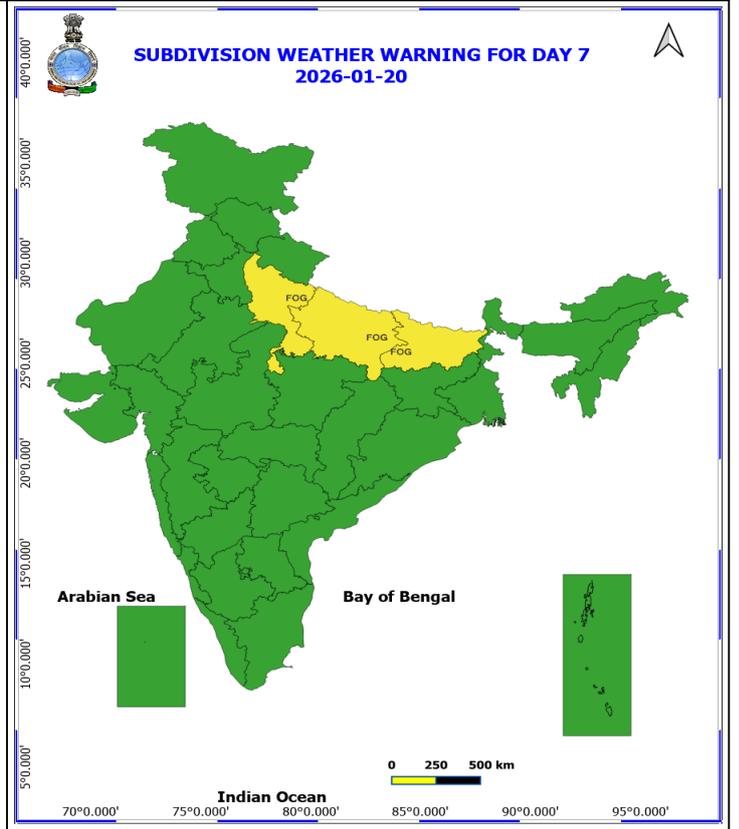

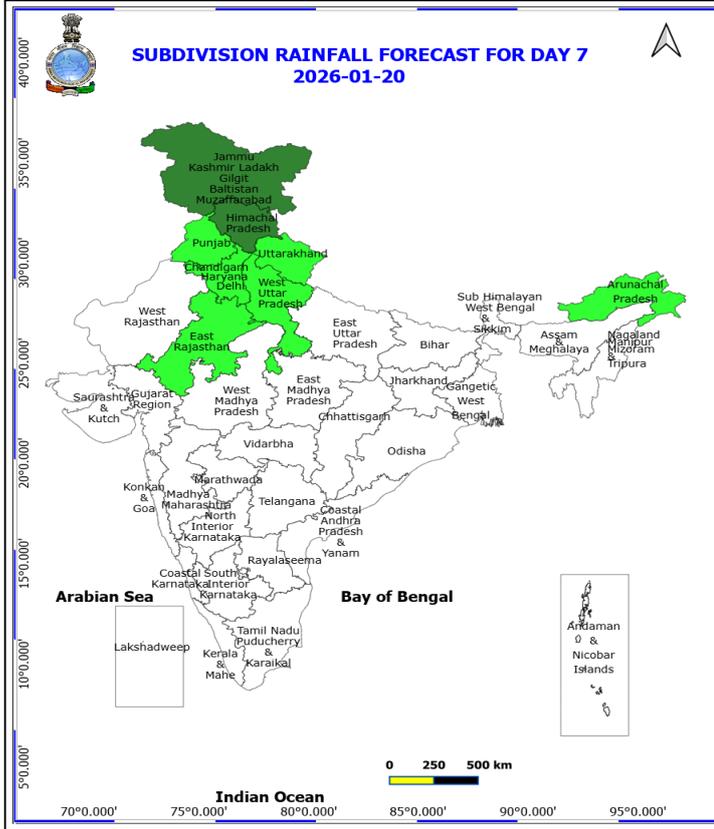

- ❖ **Dense Fog** likely at isolated places over Bihar, Haryana, Chandigarh & Delhi, Punjab, Uttarakhand and West Bengal & Sikkim.
 - ❖ **Dense to Very Dense Fog** likely at isolated places over Uttar Pradesh.
- No Warning.

19 January (Day 6)

❖ **Dense Fog** likely at isolated places over Bihar and Uttar Pradesh.

No Fishermen Warning

20 January (Day 7)

❖ **Dense Fog** likely at isolated places over Bihar and Uttar Pradesh.

No Fishermen Warning

Impact and Actions

Impact expected due to dense/very dense fog in the morning hours:

- Dense fog conditions very likely to continue over northwest India and Bihar during next 5-6 days.

Transport and Aviation:

- May affect some airports, highways and railway routes in the areas of met- sub-division.
- Difficult driving conditions with slower journey times.
- Unless taken precautionary measures, it may lead to some road traffic collisions.

Power Sector:

- Chances of Tripping of Power lines in the very dense fog routes.

Human Health:

- Lung related health impacts: Dense fog contains particulate matter and other pollutants and in case exposed it gets lodged in the lungs, clogging them and decreasing their functional capacity which increases episodes of wheezing, coughing and shortness of breath.
- Impact on people having asthma bronchitis: Long time exposure to dense fog may cause respiratory problem for people having asthma bronchitis and other lung related health problems.
- Eye Irritation: Dense fog contains pollutions of various types and these Pollutants in the air if exposed may tend to irritate the membranes of the eye causing various infections leading to redness or swelling of the eye.

Action suggested:

❖ Transport and Aviation:

- Be careful while driving or outing through any transport.
- Use fog lights during driving.
- Be in touch with airlines, railways and state transport for schedule of your journey.

❖ Power Sector:

- To keep ready Maintenance Team.
- Human Health: To avoid outing until unless emergency and to cover the face.

Impact expected due to Cold Wave to Severe Cold wave conditions:

- **Cold wave to Severe Cold wave conditions** very likely in some/many parts of Haryana, Chandigarh on 15th and Cold wave conditions in isolated pockets on 16th January.
- **Cold wave conditions** very likely in isolated pockets over Himachal Pradesh, Uttarakhand, Punjab, Rajasthan, Chhattisgarh and Jharkhand on 15th & 16th; West Uttar Pradesh & Delhi on 15th; Odisha during 15th-17th January.
- An increased likelihood of various illnesses like flu, running/ stuffy nose or nosebleed, which usually set in or get aggravated due to prolonged exposure to cold.
- Do not ignore shivering. It is the first sign that the body is losing heat. Get Indoors.
- Frostbite can occur due to prolonged exposure to cold. The skin turns pale, hard and numb and eventually black blisters appear on exposed body parts such as fingers, toes, nose and or earlobes. Severe frostbite needs immediate medical attention and treatment.
- Impact on agriculture, crop, livestock, water supply, transport and power sector at some places.

***Red color warning does not mean "Red Alert" Red color warning means "Take Action"**

Forecast and warning for any day is valid from 0830 hours IST of day till 0830 hours IST of next day

For more details kindly visit <https://mausam.imd.gov.in> or contact 011-2434-4599

(Service to the nation since 1875)

Action suggested:

- Wear several layers of loose fitting, light weight; warm woollen clothing.
- Cover your head, neck, hands and toes adequately as majority of heat loss occurs through these body parts. Wear several layers of loose fitting, light weight; warm woollen clothing rather than one layer of heavy cloth.
- Eat vitamin-C rich fruits & vegetable and drink sufficient fluids preferably warm fluids to maintain adequate immunity.
- Avoid or limit outdoor activities.
- Keep dry, if wet, change cloths immediately to prevent loss of body heat. Wear insulated/waterproof shoes.
- Warm the affected area of the body slowly with lukewarm water; do not rub the skin vigorously.
- If the affected skin area turns black, immediately consult a doctor.
- Maintain ventilation while using Heaters to avoid inhaling toxic fumes.
- Take safety measures while using electrical and gas heating devices.
- Extreme care needed for vulnerable people.
- Seek medical attention as soon as possible for someone suffering from frostbite/ Hypothermia.
- Protect livestock from cold weather.

Impact expected due to Cold Day conditions:

- **Cold day to severe cold day** conditions likely in isolated pockets of Punjab, Haryana & Chandigarh on 14th and **Cold day** conditions on 15th January.
- An increased likelihood of various illnesses like flu, running/ stuffy nose or nosebleed, which usually set in or get aggravated due to prolonged exposure to cold.
- Do not ignore shivering. It is the first sign that the body is losing heat. Get Indoors.
- Frostbite can occur due to prolonged exposure to cold. The skin turns pale, hard and numb and eventually black blisters appear on exposed body parts such as fingers, toes, nose and or earlobes. Severe frostbite needs immediate medical attention and treatment.
- Impact on agriculture, crop, livestock, water supply, transport and power sector at some places.

Action suggested:

- Wear several layers of loose fitting, light weight; warm woollen clothing.
- Cover your head, neck, hands and toes adequately as majority of heat loss occurs through these body parts. Wear several layers of loose fitting, light weight; warm Woolen clothing rather than one layer of heavy cloth.
- Eat vitamin-C rich fruits & vegetable and drink sufficient fluids preferably warm fluids to maintain adequate immunity.
- Avoid or limit outdoor activities.
- Keep dry, if wet, change cloths immediately to prevent loss of body heat. Wear insulated/waterproof shoes.
- Warm the affected area of the body slowly with lukewarm water; do not rub the skin vigorously.
- If the affected skin area turns black, immediately consult a doctor.
- Maintain ventilation while using Heaters to avoid inhaling toxic fumes.
- Take safety measures while using electrical and gas heating devices.
- Extreme care needed for vulnerable people.
- Seek medical attention as soon as possible for someone suffering from frostbite/ Hypothermia.
- Protect livestock from cold weather.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Cold Waves/ Ground Frost/ Low Temperatures

- In **Himachal Pradesh, Uttarakhand, Punjab, Haryana, West Uttar Pradesh, West Rajasthan, Odisha and Jharkhand**, apply light and frequent irrigation to the standing crops in the evening hours to protect

***Red color warning does not mean "Red Alert" Red color warning means "Take Action"**

Forecast and warning for any day is valid from 0830 hours IST of day till 0830 hours IST of next day

For more details kindly visit <https://mausam.imd.gov.in> or contact 011-2434-4599

(Service to the nation since 1875)

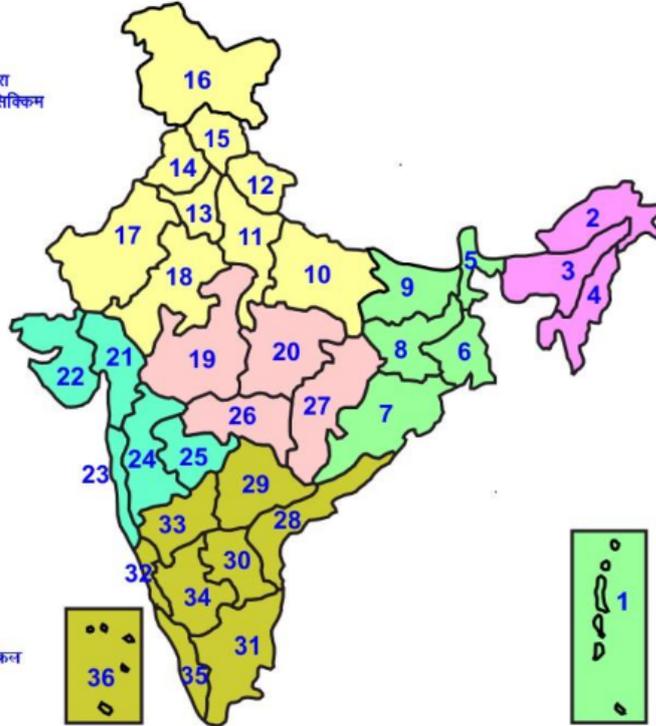

crops from low temperature stress or cold injury. Use mulching and cover the vegetable nurseries and young fruit plants with straw / polythene sheets to maintain optimum soil temperature. **Livestock / Poultry**

- Keep the cattle in the sheds during night and provide dry bedding to protect them from cold.
- Keep the chicks warm by providing artificial light in the poultry sheds.
- **Agromet advisories for likely impact of Thunderstorm / Gusty Winds**
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Heavy: 64.5 to 115.5 mm/cm *
Very Heavy: 115.6 to 204.4 mm/cm*
Extremely Heavy: > 204.4 mm/cm *

When maximum temperature of a station reaches $\geq 40^{\circ}\text{C}$ for plains and $\geq 30^{\circ}\text{C}$ for hilly regions
(a) Based on Departure from normal

Heat Wave: Maximum Temperature Departure from normal 4.5°C to 6.4°C .
Severe Heat Wave: Maximum Temperature Departure from normal $\geq 6.5^{\circ}\text{C}$

(b). Based on Actual maximum temperature

Heat Wave: When actual maximum temperature $\geq 45^{\circ}\text{C}$.
Severe Heat Wave: When actual maximum temperature $\geq 47^{\circ}\text{C}$

(c). Criteria for heat wave for coastal stations

When maximum temperature departure is $> 4.5^{\circ}\text{C}$ from normal. Heat Wave may be described provided maximum temperature $\geq 37^{\circ}\text{C}$

When maximum temperature remains 40°C

Warm Night: When minimum temperature departure 4.5°C to 6.4°C .
Severe Warm Night: When minimum temperature departure $> 6.4^{\circ}\text{C}$.

When minimum temperature of a station $\leq 10^{\circ}\text{C}$ for plains and $\leq 0^{\circ}\text{C}$ for hilly regions.

(a). Based on departure

Cold Wave: Minimum Temperature Departure from normal -4.5°C to -6.4°C .
Severe Cold Wave: Minimum Temperature Departure from normal $\leq -6.5^{\circ}\text{C}$

(b) Based on actual Minimum Temperature (for Plains only)

Cold Wave : When Minimum Temperature is $\leq 4.0^{\circ}\text{C}$
Severe Cold Wave: When Minimum Temperature is $\leq 2.0^{\circ}\text{C}$

(c) For Coastal Stations

When Minimum Temperature departure is $\leq -4.5^{\circ}\text{C}$ & actual Minimum Temperature is $\leq 15^{\circ}\text{C}$

When minimum temperature of a station $\leq 10^{\circ}\text{C}$ for plains and $\leq 0^{\circ}\text{C}$ for hilly regions
Based on departure

Cold Day: Maximum Temperature Departure from normal -4.5°C to -6.4°C .
Severe Cold Day: Maximum Temperature Departure from normal $\leq -6.5^{\circ}\text{C}$

Phenomenon of small droplets suspended in air and the horizontal visibility $< 1\text{km}$

Moderate Fog: When the visibility between 500-200 metres
Dense Fog: when the visibility between 50- 200 metres
Very Dense Fog: when the visibility < 50 metres

Sudden electrical discharges manifested by a flash of light (Lightning) and a sharp rumbling sound (thunder)

An ensemble of particles of dust or sand energetically lifted to great heights by a strong and turbulent wind.

Ice deposits on ground

Air temperature $\leq 4^{\circ}\text{C}$ (over Plains)

A strong wind that rises suddenly, lasts for atleast 1 minute.

Moderate: Wind speed 52-61 kmph
Severe: Wind speed 62-87 kmph
Very Severe: Wind speed > 87 kmph

Effect of various waves in the sea over specific area

Rough to very rough: Wind speed 41-62 kmph (22-33 knots) & Wave height 2.5-6 metre
High to very high: Wind speed 63-117 kmph (34-63 knots) & Wave height 6-14 metre
Phenomenal: Wind speed > 117 kmph (> 63 knots) & Wave height > 14 metre

Cyclonic Storm: Wind speed 62-87 kmph (34-47 knots)
Severe Cyclonic Storm: Wind speed 88-117 kmph (48-63 knots)
Very Severe Cyclonic Storm: Wind speed 118-165 kmph (64 - 89 knots)
Extremely Severe Cyclonic Storm: Wind speed 166-220 kmph (90 -119 knots)
Super Cyclone Storm: Wind speed > 220 kmph (> 119 knots)
