Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy / Very Heavy/ Extremely Heavy Rainfall

- In **Coastal Andhra Pradesh**, provide adequate drainage in paddy, groundnut, cotton, red gram, sugarcane, maize, vegetable, banana and papaya fields to prevent waterlogging. Lift lodged rice and vegetable plants after rainfall subsides, and raise and tie lodged sugarcane. Withhold sowing of rabi maize, green gram, black gram, horse gram and sunhemp until optimum soil moisture is attained. Provide mechanical support to banana and papaya plantations and stake young plants and vegetables.
- In **Rayalaseema**, ensure adequate drainage in standing crops and postpone irrigation, fertilizer application and spraying during the rainfall spell.
- In **Telangana**, provide extensive drainage in unharvested rice, maize, cotton, fruits and vegetables field. Postpone harvesting of mature rice, maize, cotton, fruits and vegetables crops and shift the already harvested produce to safer places.
- In **Tamil Nadu**, provide adequate drainage and drain excess water in rice, maize and casuarina and provide mechanical support to banana plantations. Open field drains immediately to prevent root zone waterlogging in sugarcane. Keep the harvested produce to safe and covered places.
- In **Odisha**, maintain adequate drainage from paddy, maize, groundnut, pulses, cotton, sugarcane, vegetables and orchards, particularly in low-lying fields. In lodged paddy, tie panicles into bundles and raise them upright after water recedes.. Provide support to banana and papaya plants, prop sugarcane and stake vegetables and young fruit plants against lodging.
- In **Chhattisgarh**, ensure extensive drainage in mature paddy, groundnut, sesame, vegetables, unharvested maize and pulses to prevent waterlogging. Protect harvested produce in safe, covered places and cover fruit and vegetable nurseries with polythene sheets or tarpaulins. Stake vine crops and provide support to young plants.
- In **Keralam**, ensure proper drainage in standing crop fields. Undertake rabi rice transplanting only when field conditions are suitable and prepare well-drained planting pits for banana. Provide support to banana and papaya plantations and stake young plants and vegetables wherever required to minimise damage from gusty winds.
- In **South Interior Karnataka**, maintain proper drainage in paddy, ginger and other standing crops. Harvest matured crop immediately wherever feasible and shift the already harvested produce to safer places. Provide mechanical support to banana and papaya plantations and stake young plants and vegetables in areas exposed to gusty winds.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

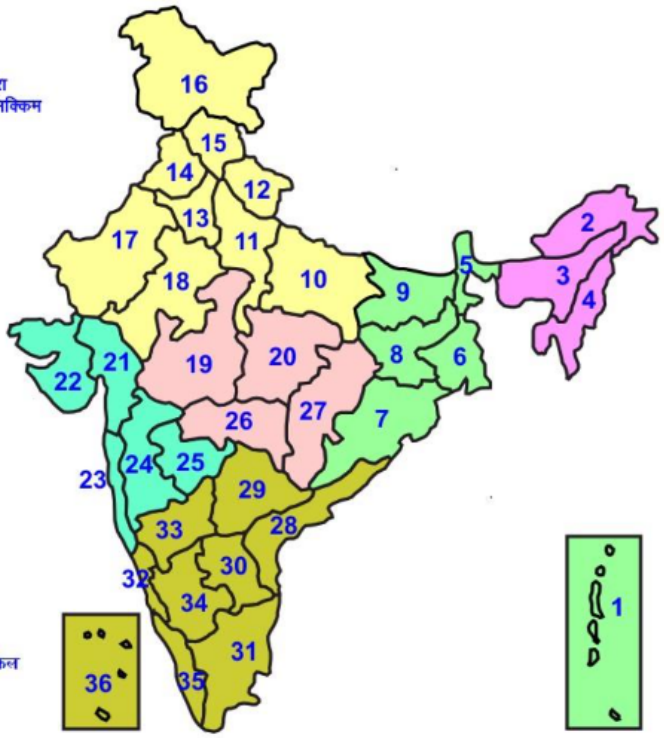

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
