- Dense fog conditions very likely over Chhattisgarh on 24th November; Haryana Chandigarh & Delhi during 26th-27th November; Himachal Pradesh during 24th-26th November; Punjab during 24th-27th November.

Transport and Aviation:

- May affect some airports, highways and railway routes in the areas of met- sub-division.
- Difficult driving conditions with slower journey times.
- Unless taken precautionary measures, it may lead to some road traffic collisions.

Power Sector:

- Chances of Tripping of Power lines in the very dense fog routes.

Human Health:

- Lung related health impacts: Dense fog contains particulate matter and other pollutants and in case exposed it gets lodged in the lungs, clogging them and decreasing their functional capacity which increases episodes of wheezing, coughing and shortness of breath.
- Impact on people having asthma bronchitis: Long time exposure to dense fog may cause respiratory problem for people having asthma bronchitis and other lung related health problems.
- Eye Irritation: Dense fog contains pollutions of various types and these Pollutants in the air if exposed may tend to irritate the membranes of the eye causing various infections leading to redness or swelling of the eye.

Action suggested:

Transport and Aviation:

- Be careful while driving or outing through any transport.
- Use fog lights during driving.
- Be in touch with airlines, railways and state transport for schedule of your journey.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

In **Tamil Nadu,** strengthen field bunds and drainage channels in rice fields to drain out excess rainwater. Ensure adequate drainage in plantation crops and fields of cotton, potato and small onion to avoid water stagnation. Harvest matured crops of rice, groundnut, pulses and millets and store the harvested produce in safe and dry places. Provide staking to tomato, chilli and creeper vegetables and mechanical support to sugarcane, banana, papaya and moringa plants to prevent lodging.

In **Coastal Andhra Pradesh**, ensure proper drainage in rice fields to prevent prolonged water stagnation, and drain excess water from sugarcane, maize, cotton and banana fields. Harvest fully matured and completely burst cotton bolls during dry intervals and store the kapas in a safe, covered place; avoid picking wet kapas. Lift and tie lodged sugarcane and postpone rabi sowing of maize, ragi, groundnut and sunhemp until optimum soil moisture is attained.

In **Rayalaseema**, ensure proper drainage in standing crop fields and postpone fertilizer application and spraying during rainfall. continue sowing of rabi groundnut, only under suitable soil-moisture conditions. Provide mechanical support and propping to horticultural crops and staking to vegetables to minimise lodging.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.

Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

Keep the animals inside the shed during heavy rainfall and provide them balanced feed.

Store the feed and fodder in a safe place to prevent spoilage.

Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
