### Agromet advisories for various parts of the country

#### Agromet advisories for likely impact of Above normal Temperatures

In **Jammu and Kashmir**, apply light irrigation to wheat, mustard and vegetables.

In **Himachal Pradesh**, provide protective irrigation to wheat and early vegetables. Maintain ventilation in polyhouses for capsicum and tomato.

In **Punjab**, maintain optimum soil moisture through irrigation in mustard, gobhi sarson and potato.

In **Haryana**, provide light irrigation to mustard and gram at flowering and pod formation stages.

In **Uttarakhand**, provide light and frequent irrigation in wheat, lentil, chickpea and mustard during critical growth stages (flowering and grain filling in wheat, pod formation in mustard and gram etc.).

In **Western Uttar Pradesh**, provide light and frequent irrigation in wheat, mustard and chickpea, potato and early planted sugarcane.

In **Rajasthan**, provide protective irrigation in cumin, isabgol, mustard and gram.

In **Uttar Pradesh**, provide light irrigation in wheat (grain filling stage), mustard and gram crops during morning or evening hours to reduce adverse impacts of heat and prevention of forced maturity.

Take appropriate action for conservation of soil moisture through mulching, proper field bunding, and avoiding unnecessary intercultivation.

#### Livestock / Poultry

Provide clean, hygienic and plenty of drinking water to animals.

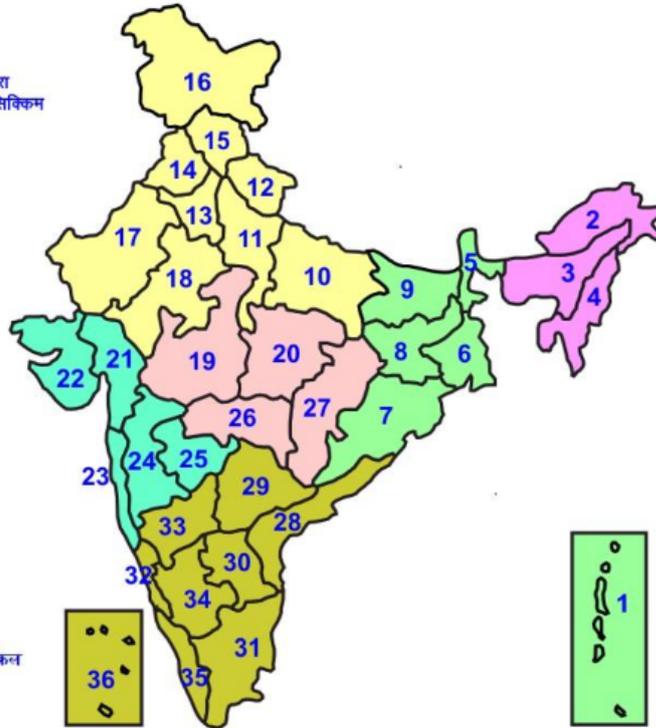

To reduce the effect of heat wave/high temperature, cover the roof of poultry sheds with grass.

#### Agromet advisories for likely impact of Thunderstorm / Gusty Winds

Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.
