In **Kymore Plateau and Satpura Hill Zone**, drain out excess water from vegetables.
- In **Chhattisgarh**, ensure proper drainage in rice nurseries and fields of rice, maize, pigeon pea, minor millets and vegetables.
- In **Mid Hills Sub Humid Zone of Himachal Pradesh**, provide support to the cucumber vines and maintain proper drainage in vegetable and maize fields. In **Sub Montane and Low Hills Sub Tropical Zone**, ensure proper drainage in maize fields to avoid water logging.
- In **Uttarakhand**, ensure proper drainage facilities in soybean, maize, barnyard millet, finger millet, pigeon pea, kidney beans, vegetables and orchards. Harvest matured vegetables and fruits and store in safe place.
- In **South Western Semi-Arid Zone of West Uttar Pradesh**, make proper arrangements to drain out excess water from the fields of paddy, spring sugarcane, pigeon pea, maize and vegetables.
- In **Southeastern Humid Plain Zone of East Rajasthan**, make provision to drain out excess water from rice nurseries and fields of maize, soybean and black gram. In **Flood Prone Eastern Plain Zone**, postpone sowing / re- sowing of sesame, green gram and pearl millet during heavy rains.
- In **Jharkhand**, make necessary arrangements to drain out excess water from maize fields, rice and vegetable nurseries. Cover the vegetable nurseries with polythene sheets.

### Livestock / Fishery

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain out excess water, thereby preventing fish from escaping in case of overflow.

### Agromet advisories for likely impact of Thunderstorm / Gusty Winds / Squally Winds

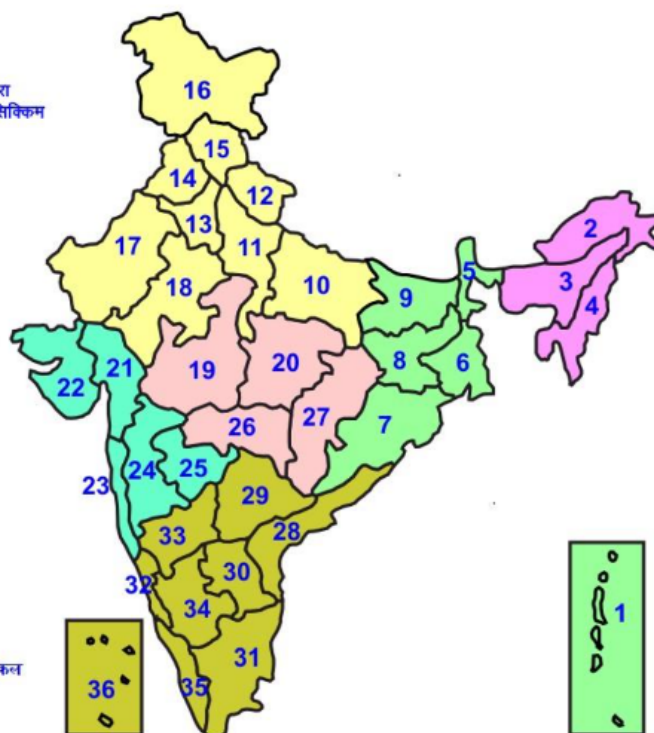

- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.
