Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

In **Sikkim**, ensure effective field drainage to prevent waterlogging.

In **Arunachal Pradesh**, harvest cabbage, pea, mustard, late-maturing paddy varieties & potatoes carefully and shift the harvested produce to safe places. Ensure proper drainage channels in the fields of rice, maize, other standing crops, vegetables and orchards.

Agromet advisories for likely impact of High temperatures/ Heat Waves

In **Odisha**, provide light irrigation to *Boro* paddy, summer maize, green gram, black gram, groundnut, and vegetable fields. Maintain appropriate soil moisture in mango and cashew.

In **Chhattisgarh**, complete harvesting of wheat and chickpea, and ensure safe storage. Irrigate summer maize, green gram and vegetables. Maintain soil moisture in mango and litchi.

In view of hot and humid weather in **Tamil Nadu, Kerala, Andhra Pradesh, Coastal Karnataka, Madhya Maharashtra** and **Gujarat** State, apply light irrigation to summer crops and vegetables.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.

Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Livestock / Poultry

Keep the animals inside the shed during heavy rainfall and provide them balanced feed.

Store feed and fodder in a safe place to prevent spoilage.

Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
