Agromet Advisory Services Bulletin

Meteorological Centre Bhopal

India Meteorological Department

Bulletin No. 52/2025

Issued on Tuesday 01.07.2025

Validity 02 July 2025 to 06 July 2025

Next update: 04.07.2025

Issued by
Meteorological Centre Bhopal,
India Meteorological Department
In collaboration with
JNKVV, Jabalpur & RVSKVV, Gwalior
and
Department of Farmers Welfare & Agricultural
development, Bhopal, M.P.

PART A

Weather warnings (Met-Subdivision Level)

01 July 2025

Very Heavy to Extremely Heavy Rainfall at Isolated Places accompanied with Thunderstorm & lightning/ Gusty wind warning for Madhya Pradesh.

02 July 2025

Heavy to very Heavy Rainfall at Isolated Places accompanied with Thunderstorm & lightning/ Gusty wind warning for Madhya Pradesh.

03 July 2025

Heavy to Very Heavy Rainfall at Isolated Places accompanied with Thunderstorm & lightning/ Gusty wind warning for Madhya Pradesh.

04 July 2025

Heavy to Very Heavy Rainfall at Isolated Places accompanied with Thunderstorm & lightning warning for Madhya Pradesh.

05 July 2025

Heavy to Very Heavy Rainfall at Isolated Places accompanied with Thunderstorm & lightning warning for Madhya Pradesh.

Extended Range forecast at Met-Subdivision Level (5th July to 11th July 2025)

Meteorological Sub-Division	Rainfall	Maximum Temperature	Minimum Temperature
West Madhya Pradesh	Normal	Below Normal	Below Normal
East Madhya Pradesh	Normal	Below Normal	Normal

Likely impacts of weather warnings (General)

- Waterlogging in low-lying areas and urban streets.
- Decreased visibility, accidents likely on wet/slippery roads.
- Risk of electric shock or fire due to lightning or fallen electric lines.
- Flash floods in vulnerable spots.
- Disruption in road and rail transport.

Impact based advisories (General)

- Avoid travel during peak rainfall or lightning periods.
- Stay indoors; do not shelter under trees or electric poles.
- Disconnect electronic appliances during lightning.
- Keep emergency kits, water, and mobile phones ready.
- Children, elderly, and sick persons should avoid going out.

Likely impacts of weather warnings on Agriculture

- Soybean, Maize (Sowing/Emergence Stage): Seed wash-off or rotting due to waterlogging, Lodging of emerging seedlings.
- Vegetables (e.g. Tomato, Brinjal, Cucurbits): Breakage of stems and uprooting of young plants, Fruit drop or damage due to gusty winds.
- Paddy Nursery: Submergence, increased disease risk (blast, sheath blight), Risk of soil erosion and nutrient loss in hilly/sloped fields.
- Increased risk of respiratory infections, foot diseases in animals standing in muddy or wet conditions.

General Agromet Advisories

- Postpone sowing or pesticide spraying until weather stabilizes.
- Ensure proper drainage in fields; clean furrows, bunds, and outlets.
- Cover paddy nurseries with polythene or shade nets if runoff risk is high.
- Store seeds, fertilizers, and tools in elevated waterproof places.
- Strengthen support of vegetable crops with stakes or trellising.
- Avoid use of machinery in waterlogged fields.
- Vaccinate or treat animals against foot rot and respiratory infections if needed.
- Keep animals indoors or under strong shelters.
- Don't let animals graze during lightning or heavy winds.

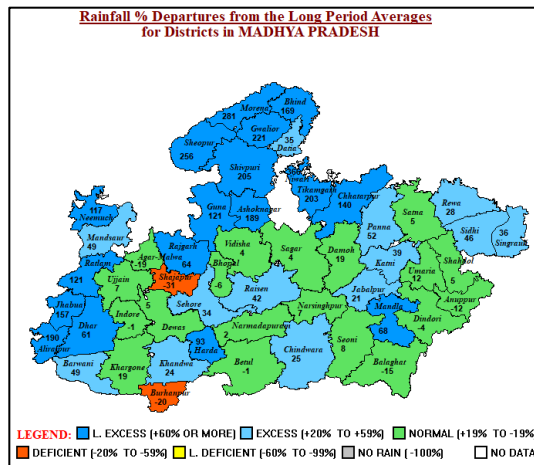

PART B

Rainfall Summary over the State (27– 30 June 2025):

Met Sub Division	27-06-2025	28-06-2025	29-06-2025	30-06-2025
West Madhya Pradesh	WS	FWS	FWS	WS
East Madhya Pradesh	WS	WS	SCT	FWS

Past Weather Summary – 27.06.2025 to 30.06.2025

From 27th to 30th June 2025, the monsoon systems evolved significantly across India. On 27th June, the **northern limit of monsoon (NLM)** remained unchanged, while an **upper air cyclonic circulation (UAC)** persisted over southwest Rajasthan, tilting south-westward with height, and an **east-west trough** extended from it to Bangladesh. The **low-pressure area (LPA)** over north Odisha weakened, but its associated UAC merged into the main trough. On 28th June, a **new LPA formed over Saurashtra & Kutch** due to a UAC over the northeast Arabian Sea, while another UAC developed over **central south Uttar Pradesh**. The **east-west trough** shifted eastwards from southwest Bangladesh to northeast Madhya Pradesh. By 29th June, the **southwest monsoon had covered the entire country**, nine days ahead of normal. The **LPA over northwest Bay of Bengal** persisted and moved inland slowly, while the trough extended from **south Rajasthan to the Bay** across central India. Multiple UACs existed over **north Haryana, south UP, north Arabian Sea, and south Rajasthan**. On 30th June, the **LPA shifted to coastal Gangetic West Bengal**, with a deeper trough at the surface passing through Delhi to northeast Bay. The UAC over **south Rajasthan persisted**, and a new **east-west trough** from southwest UP to the Bay became active at lower levels, merging some earlier circulations. The UAC over north Haryana became less marked, indicating weakening of some synoptic systems as the monsoon stabilized.

- **Highest Maximum Temperature:** 35.2°C recorded at Gwalior on 27 June.
- **Lowest Minimum Temperature:** 18.0°C recorded at Khandwa on 30 June.
- **Lowest Humidity:** 48% recorded at Khandwa on 27 June.
- **Highest Humidity:** 100% recorded at Nowgong on 28 June & Gwalior on 30 June.

Rainfall forecast for next 5 days

Met Sub Division	01-07-2025	02-07-2025	03-07-2025	04-07-2025	05-07-2025
West Madhya Pradesh	WS	WS	FWS	FWS	WS
East Madhya Pradesh	WS	WS	WS	WS	WS

ISOL: Isolated i.e. Rain at 1 or 2 places

SCT: Scattered i.e. Rain at a few places

FWS: Fairly Widespread i.e. Rain at many places

WS: Widespread i.e. Rain at most places

DRY: No rain

Synoptic Situations

- The Low-Pressure Area over Gangetic West Bengal & adjoining north Odisha lay over Jharkhand and neighbourhood at 0830 hrs IST of today, the 01st July 2025. The associated cyclonic circulation extending upto 5.8 km above mean sea level. It is likely to move slowly west-northwestwards across Jharkhand during next 24 hours.
- The Monsoon Trough at mean sea level now passes through Sri Ganganagar, Rohtak, Kanpur, Varanasi, centre of the low pressure area over Jharkhand & neighbourhood, Digha and thence southeastwards to eastcentral Bay of Bengal and extends upto 0.9 km above mean sea level.
- A Trough runs from northwest Uttar Pradesh to cyclonic circulation associated with the low-pressure area over Jharkhand and neighbourhood across southeast Uttar Pradesh between 1.5 & 3.1 km above mean sea level.

General Forecast for next 5 days

No Large Change for Next 5 days.

Satpura Plateau Agro climatic Zone:AMFU Chhindwara (Betul, Pandhurna and Chhindwara)

Soybean (Sowing Stage)

- Ensure proper drainage in waterlogged conditions.
- Use BBF/Ridge Furrow sowing to stabilize yield under erratic rainfall.
- For Yellow Mosaic Virus prevention, treat seeds with Thiamethoxam 30 FS or Imidacloprid 48 FS.
- Use row spacing of 45 cm and plant-to-plant spacing of 5–10 cm; sow seeds at 2–3 cm depth at a rate of 60–70 kg/ha.

Maize (Sowing Stage)

- Ensure drainage in waterlogged fields.
- Use suitable hybrid varieties like JM 215, JM 216, JM 218, HQPM-1, HQPM-5, Vivek-1, PJHM-1.
- Begin sowing after 100 mm rainfall post-monsoon arrival.
- Apply basal fertilizer dose: 30:60:60 NPK kg/ha at sowing.
- Timely sowing in June helps prevent pink bollworm infestation.

Cotton (Sowing Stage)

- Start sowing after adequate rainfall (about 100 mm).
- Apply basal fertilizer dose at sowing time.
- Timely sowing in June is important for pest management.

Sugarcane (Tillering Stage)

- Maintain proper drainage to prevent Pyrilla pest outbreaks.
- Apply urea in split doses at 90, 120, and 150 days after planting.
- For top shoot borer control, apply Phorate at 10g or Carbofuran at 15g/plant.
- For broader control, spray Chlorpyrifos 50% EC @ 300–400 g/acre or Cartap hydrochloride 4% @ 8–10 kg/ha.

Cauliflower, Tomato, Chilli, Brinjal (Nursery & Land Prep)

- Prepare nurseries (seedlings should be 5–6 inches tall and 3 feet wide).
- Use Carbendazim @ 2.0 g/kg seed for seed treatment.
- Favorable weather for sowing kharif vegetables; apply fertilizers based on soil test.
- Cucurbits can also be sown.

Fruit Plants (Pit Preparation)

- Suitable weather for planting, pruning, and budding.
- Use 3:2:1 soil:sand:FYM mix in pits for new plantations.
- Repair basins and clear old fruit tree debris.

Cattle

- Provide clean water and shade.
- Vaccinate animals for FMD and HS.
- For ecto-parasite control, use Butox or Ectomin.
- Feed 50–60 g mineral mixture daily to maintain milk yield and reproduction.

Central Narmada Agro climatic Zone :AMFU Powarkheda (Narsinghpur, Narmadapuram)

Sugarcane (Vegetative Growth Stage):

- Complete earthing up by placing soil around the plant base to prevent lodging and improve drainage.
- Create proper drainage channels to remove excess water.

Paddy (Nursery Stage):

- Use improved varieties like PB 1, PB 6, Pusa Sugandha, Mahamaya, Jaya, etc.

- Treat seeds with Carbendazim or Thiram @ 2 g/kg after soaking for 24 hours before nursery sowing.
- Complete nursery sowing at the earliest.

Soybean (Pre-Sowing Stage):

- Prepare fields and start sowing once soil moisture is adequate.
- Use improved varieties such as JS 93-05, JS 95-60, JS 97-05, JS 21-72, JS 22-12, JS 22-16, JS 23-03, JS 20-34, JS 23-09.
- Treat seeds with Thiram or Carbendazim @ 3 g/kg before sowing.

Maize (Pre-Sowing Stage):

- Use improved varieties like Jawahar Maize 218, Jawahar Maize 215.
- Begin sowing after ensuring sufficient soil moisture.
- Treat seeds with Carbendazim @ 2 g/kg, Thiram @ 4 g/kg, or Metalaxyl @ 3 g/kg.

Brinjal, Chilli (Nursery Stage): Complete kharif nursery sowing with proper seed treatment.

Okra (Sowing Stage): Complete kharif sowing with seed treatment.

Livestock Advisory:

Cows:

- Provide 50 g iodized salt and 50–100 g mineral mixture daily with feed/fodder.
- Vaccinate against Foot and Mouth Disease (FMD).
- Ensure fresh and clean water is available.
- Shelter animals during thunderstorms, gusty winds, and rainfall.

Goats:

- Vaccinate against Enterotoxaemia (ETV).
- Control ticks and mites effectively.
- Ensure availability of clean drinking water.
- Keep goats indoors during adverse weather.

Poultry (Hens):

- Turn and dry poultry shed bedding when wet and apply lime to keep it dry.
- Provide mineral mixtures and clean water to poultry regularly.

Jhabua hills Agro climatic Zone:AMFU Jhabua (Jhabua, Alirajpur,Dhar)

Soybean (Sowing):

- Use improved varieties like JS-20-69, RVSM-1135, Raj Soya-18, JS-20-98, RVS-24.
- Treat seeds with Thiram (2 g) + Carbendazim (1 g) per kg, followed by Rhizobium and PSB @ 5 g/kg.
- Use 70–80 kg seed/ha with >70% germination.
- Maintain row spacing of 30–45 cm; sow using ridge & furrow or BBF method for better water management.

Maize (Sowing):

- Select suitable varieties like JVM 421, JM 218, JM 216, HQPM-1, HQPM-5.
- Treat seeds with Thiram (2 g) + Carbendazim (1 g)/kg, followed by Azotobacter & PSB @ 5 g/kg.
- Maintain spacing of 60–75 cm between rows and 20–25 cm between plants.

Cotton (Sowing):

- Use improved varieties such as DCH-32 and Bt II cotton.
- Treat seeds with 2 g Carbendazim per kg.
- Maintain spacing of 90–120 cm between rows and 90 cm between plants.

Black Gram (Sowing):

- Use varieties like JU 86, PU-31, Indra Urd-1, and Pratap-1.
- Seed treatment with Thiram (2 g) + Carbendazim (1 g) and Rhizobium & PSB @ 5 g/kg.
- Maintain 30–45 cm row spacing and sow using ridge & furrow seed drill.

Fruits (Fruit formation):

- Arrange improved variety buds for budding on 3–4 healthy new branches, previously selected, of old and local (desi) ber plants. Budding should then be carried out.
- While developing a new orchard, previously dug holes should be filled with a mixture of sand, soil, and FYM (Farm Yard Manure) or vermicompost.
- Arrange improved fruit plant varieties for transplanting, and then transplant them.

Vegetables (Flowering/ Fruiting):

- Stop irrigation due to forecast of rain and dust storms.
- Ensure proper drainage to avoid waterlogging.
- Harvest ready crops like tomato, brinjal, okra, etc., and sell in the market.
- Prepare seedlings of rainy season vegetables.
- Use ridge & furrow method for field preparation.

Livestock Advisory:

Poultry: Keep windows and doors closed during dust storms, thunderstorms, and lightning to prevent bird stress and fire hazards.

Cattle & Goats:

- Shelter animals indoors during dust storms, lightning, or heavy rain.
- Deworm cattle, goats, and newborn animals.
- Vaccinate against BQ, Anthrax, HS, and FMD.
- Provide 10 kg green fodder per day to lactating animals.
- Give 50 g mineral mixture daily per animal for balanced nutrition.

Bundelkhand Agro climatic Zone: AMFU Tikamgarh (Datia, Tikamgarh, Chhatarpur, Niwari)

Paddy Nursery: Regularly monitor seedbeds and remove weeds.

Kharif Crop Sowing: Begin sowing of soybean, maize, urad, green gram, sesame, and groundnut using the ridge and furrow method.

Kharif Onion Nursery: Due to forecasted heavy to very heavy rainfall, prevent water stagnation in nurseries to protect seedlings.

Tomato and Chilli (Vegetative Stage): Monitor for viral disease. Uproot and bury infected plants to control spread.

Cucurbits (Flowering Stage)

- Monitor for pests and diseases.
- Provide climbing support to avoid fruit rotting in standing water.

Ginger: Start sowing ginger using improved varieties.

Orchards

- **New Orchard:** Plant saplings in pre-dug pits.
- **Existing Orchard:** Deep dig around trees, form basins, and remove excess water.

Livestock Advisory

- **Cattle:** Avoid drinking dirty pond water. Deworm animals every 15–20 days.
- **Poultry:** Ensure proper ventilation; remove gunny bags from windows/doors.
 - Supplement feed with vitamins and calcium.
 - Add 0.25% salt solution to drinking water.

Gird Agro climatic Zone: AMFU Morena (Morena, Bhind, Gwalior, Sheopur, Guna, Ashoknagar, Shivpuri)

Maize (Harvesting Stage): Farmers are advised to harvest mature maize cobs, dry them properly, and store in a safe place to avoid post-harvest losses.

Pearl Millet / Bajra (Harvesting Stage): Harvest mature bajra heads and arrange seeds of improved varieties for the next season.

Pigeon Pea / Arhar / Red Gram (Pre-sowing Stage): Prepare for sowing pigeon pea using improved varieties like Pusa-991, Pusa-992, and Pusa-2002, and treat the seeds before sowing.

Rice / Paddy (Nursery Stage): Ensure nursery management and disease control of paddy seedlings in advance.

Brinjal (Fruit Maturity Stage): High humidity can lead to rotting of fruits and vegetables; hence, harvest mature brinjal on time and sell in market to avoid losses.

Chilli (Vegetative to Flowering Stage): There is a risk of leaf curl (viral disease). To control it, spray Dimethoate 25 EC @ 100 ml per 500–600 liters of water per hectare.

Tomato (Vegetative to Flowering Stage): Similar to chilli, tomatoes are also prone to leaf curl. Use the same treatment as above. Avoid spraying during cloudy or rainy weather.

Livestock Advisory:

Buffalo (All Stages)

- Due to humid conditions, there's a risk of Foot and Mouth Disease (FMD).
- Clean animal sheds regularly and ensure animals drink clean water mixed with 5 ml bleaching powder per liter of water once daily for disease prevention.

Vindhyan Plateau Agro climatic Zone: AMFU Sehore (Sagar, Bhopal, Sehore, Raisen, Vidisha, Damoh)

Kharif Crops

- **Sowing Preparation:** Begin Kharif sowing when there is at least 4 inches of rainfall or 8 inches of soil moisture. Ensure bunding and soil-water conservation practices are completed.
- **Seed Treatment (Pulses):** Use Thiram (2 gm) + Carbendazim (1 gm) + Rhizobium (3 gm) + PSB culture (2 gm) per kg of seed.
- **Weed Control:** After sowing, apply Diclosulam 84 WDG (12 gm/acre) or Sulfentrazone (750 ml/ha) or Pendimethalin (2.25 L/ha).

Improved Varieties

- **Soybean:** Recommended varieties include RVS 1-4, RVS-24, JS-95-60, JS-20-98, JS-93-05, JS-20-69. Use ridge-bed-furrow or BBF method for sowing. Ensure irrigation at pod-filling stage if rainfall is absent.
- **Maize:** Use improved varieties like JM-8, JM-12, and sow in rows.

- **Pigeon Pea:** Recommended varieties are TJT-501, Jawahar Arhar-4, Asha (ICPL-87119), JKM-7, RVA-28, RVICPH-2671, ICPL-88039, JKM-189. Sowing should be done in irrigated fields.

Summer Crops

- **Nursery Preparation:** For paddy, prepare nursery using improved varieties like Pusa Basmati 1692, Pusa Sugandha-3, and 5.
- **Pest Management (Mung/Urd/Cucurbits):** Due to cloudy weather and risk of pod borers, apply Profenophos 50 EC (1500 ml/ha in 600–700 L water) or dust Methyl Parathion 2% (25 kg/ha).

Horticulture

- **Orchards:** Do gap filling in new orchards. To control pests, spray Malathion (2 ml) + Mancozeb (3 gm) per litre of water.

Livestock Management

Pests & Weather Protection:

- For mango mealy bug, apply sticky bands with chlorpyrifos 1.5% dust (500 gm/plant) mixed in soil.
- Keep poultry sheds closed during storms and lightning to reduce bird stress and injury.

Animal Health:

- Deworm cattle, goats, and young animals.
- Vaccinate kids/lambs against PPR disease.

Fodder & Nutrition:

- Harvest green fodder (sorghum, maize, chari, lobia) timely.
- Provide shelter and cool drinking water (3 times/day).
- Feed each animal 50 g of mineral mixture, 10 kg of green fodder daily, and additional concentrate as needed.

Malwa Plateau Agro climatic Zone: AMFU Indore (Ujjain, Indore, Mandsaur, Ratlam, Shajapur, Dewas, Agar malwa, Neemuch, Rajgarh)

Tomato (Fruit formation): To control fruit borer in tomato crop, infested fruits should be collected and buried inside the soil. If pest population is high, spraying of Chlorantraniliprole 18.50% SC @ 0.3 mL/L of water is advised when sky remains clear.

Okra/Ladyfinger (Fruit formation): Farmers advise to use recommended insecticides to control insect-pests of okra.

Livestock Advisory:

- Clean the animals shed regularly and clean the floor by mixing 5 mL phenyl in 1 L of water.
- Possibility of spread hemorrhagic septicemia, anthrax disease in animal for control, vaccine the animal advice of a doctor.

Nimar Valley Agro climatic Zone: AMFU Khargone (Khargone, Burhanpur, Harda, Barwani, Khandwa)

Chilli (Vegetative): To prevent Aphid, Thrips, Whitefly, and Fruit borer infestation in chilli, spray 5% neem seed kernel extract (NSKE).

Cotton (Vegetative): Farmers who have not applied basal dose of fertilizer in cotton they use immediate 20 kg Urea + 30 kg DAP + 20 kg Potash/acre at 30 days of cotton with using ring of column method.

Arhar(Sowing):

- For sowing of Arhar, use varieties like TJT-501, JKM-189 and IPA 15-6 etc.
- Before sowing seeds should be treated with crop specific Rhizobium culture and Phosphate Solubilizing bacteria.

Soyabean (Sowing):

- Select 2-3 Soybean varieties recommended for your area and ensure the availability of seed.
- Ensure the quality of available soybean seed by carrying out Germination test (Minimum 70 %) for proper plant stand.

Livestock Advisory

- Provide shelter and rain protection.
- Ensure availability of clean and cool drinking water.
- Use Malathion/cleaner/Butox 2ml/lit. of water on whole body of animals to prevent from the ticks and lice.
- Tied mushika on mouth of animal after using medicines.

Kymore plateau & Satpura Hills Agro climatic Zone: AMFU Jabalpur (Jabalpur, Satna, Maihar, Mauganj, Panna, Seoni, Rewa, Sidhi, Anuppur, Singrauli, Umaria, Mandla, Dindori, Katni, Balaghat, Shahdol)

Green Gram & Black Gram : At present Green gram & Black gram is at harvesting stage, it is advised to don't irrigate the crop. The places where moong and urd crops have been matured, harvest the crop and store it in a safe place.

Maize: Harvest matured maize now to avoid damage and ensure proper grain drying under dry conditions

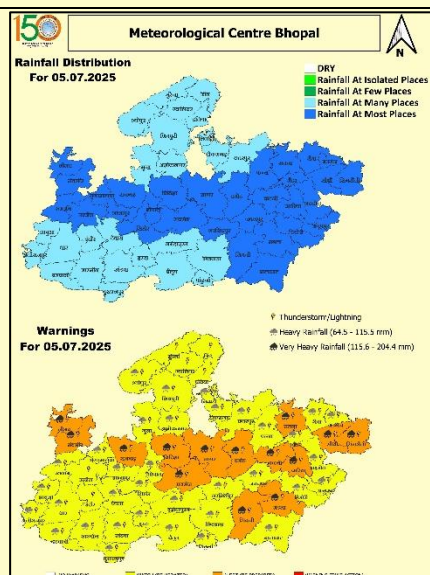

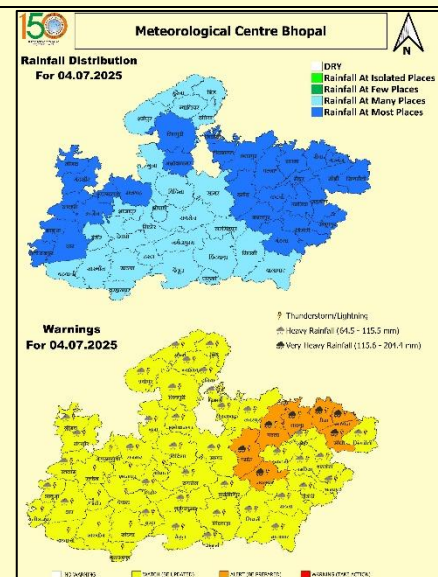

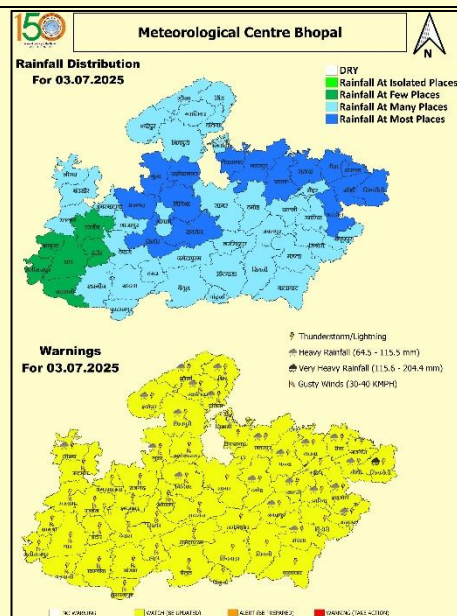

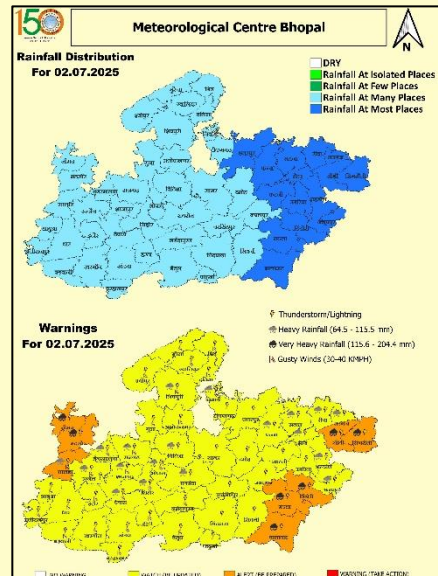

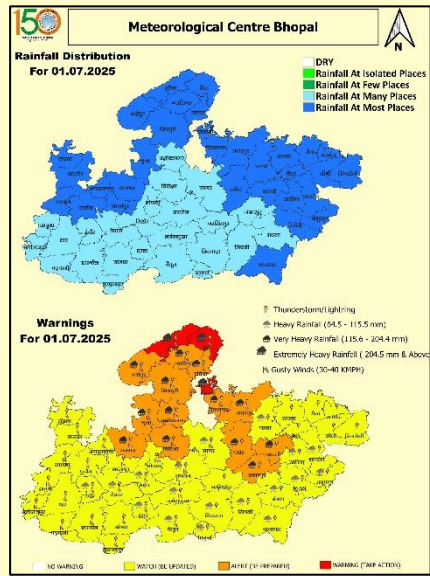

Soyabean: Plant soybean disease resistant varieties like JS 21-72, RVS 2002-4, RVSM2011-35, Indore soya 130, JS 20-29, JS 20-34, JS 20-69, JS 20-94, JS 20-98, JS 20-116, NRC-38, NRC-86, NRC-127, NRC-150.

Livestock Advisory

- Keep animals in the shade.

- Provide pure and cold water 3 times a day.
- Feed green fodder and mineral mixtures.
- Milk-producing animals should be kept at home and fed grass.
- De-worm calves regularly.

TS : Thunder Storm

Distribution of Rainfall

		हिन्दी
(76 - 100)% of stations receives rainfall	(WS) Widespread / Most Places	विसृत / अधिकांश स्थानों पर / सर्वत्र
(51-75)% of stations receives rainfall	(FWS) Fairly Widespread / Many Places	अधिकांश विसृत / बहुत से स्थानों पर / बहुत सर्वत्र
(26-50)% of stations receives rainfall	(SCT) Scattered / A Few Places	कुछ स्थानों पर / वितरित
(1-25)% of stations receives rainfall	(ISOL) Isolated places	अलग अलग स्थानों पर
No station reporting rain	(DRY) Dry	शुष्क

Intensity of Rainfall

		हिन्दी
Very Light	0.1 to 2.4 mm	बहुत हल्की वर्षा
Light	2.5 - 15.5 mm	हल्की वर्षा
Moderate	15.6 - 64.4 mm	मध्यम वर्षा
Heavy	64.5 - 115.5 mm	भारी वर्षा
Very Heavy	115.6 - 204.4 mm	बहुत भारी वर्षा
Extremely Heavy	≥ 204.5 mm	अत्यधिक भारी वर्षा
Exceptionally Heavy	When the amount is a value near about the highest recorded rainfall at or near the station for the month or season. However, this term will be used only when the actual rainfall amount exceeds 12 cm	असाधारण भारी वर्षा

Probability of Occurrence (%)

		हिन्दी
Unlikely	< 25	संभावना नहीं
Likely	25 - 50	संभवित
Very Likely	50 - 75	अधिक संभावना
Most Likely	> 75	अत्यधिक संभावना

Warning Colour Codes

	हिन्दी
WARNING (TAKE ACTION)	चेतावनी
ALERT (BE PREPARED)	सतर्क रहे
WATCH (BE UPDATED)	निगरानी रखें
NO WARNING (NO ACTION)	कोई चेतावनी नहीं
