

Agromet Advisory Service Bulletin for the State of Uttarakhand

(Advisories mentioned in the bulletin are prepared by different AMFUs and DAMUs in Uttarakhand)

Bulletin No. 53/2025

Issued on 04.07.2025

Weather warnings (District Level)

➤ **04th June:**

- Heavy to very heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in Bageshwar district and Heavy rain at isolated places in Rudraprayag district of Uttarakhand.
- Heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in Dehradun and Chamoli districts of Uttarakhand.
- Thunderstorm accompanied with Lightning / intense spell of rain is likely to occur at isolated places in remaining hilly districts of Uttarakhand.

➤ **05th June:**

- Heavy to very heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in Bageshwar and Rudraprayag districts of Uttarakhand.
- Heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in Dehradun, Chamoli, Pithoragarh and Nainital districts of Uttarakhand.
- Thunderstorm accompanied with Lightning / intense spell of rain is likely to occur at isolated places in remaining hilly districts of Uttarakhand.

➤ **06th June:**

- Heavy to very heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in Dehradun, Rudraprayag, Tehri and Bageshwar districts of Uttarakhand.
- Heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in remaining districts of Uttarakhand.

➤ **07th June:**

- Heavy to very heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in Dehradun, Rudraprayag, Tehri and Bageshwar districts of Uttarakhand.
- Heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in remaining districts of Uttarakhand.

➤ **08th July:**

- Heavy rain / Thunderstorm accompanied with Lightning / intense to very intense spell of rain is likely to occur at isolated places in hilly districts of Uttarakhand.
- Thunderstorm accompanied with Lightning / intense spell of rain is likely to occur at isolated places in plain districts of Uttarakhand.

Extended Range forecast for Uttarakhand (11th July, 2025 to 17th July, 2025)

UTTARAKHAND	Rainfall	Max Temp	Min Temp
04.07.2025 to 10.07.2025	Deficient	Normal	Normal

Likely impacts of weather warnings (General):

- Landslide, rock fall and mudslides due to heavy rain or intense rainfall spell at isolated places.
- Blocking/washout of roads/highways/bridges due to rock fall/ landslide and floods at isolated places.
- Community services like electricity, water etc. will be affected at isolated places.
- Supply and transportation will be affected at isolated places for a few days.
- Isolated instances of damage to life and property.
- Continuous heavy rainfall may cause Dams/Barrages to increase the discharge causing rise in the river water level. Moderate increase in water level of major rivers and their tributaries.
- Heavy rains falling on melting snowpack can produce sudden increase in water flow in rivulets and rainwater streams that may result in bank erosion/overflow/flash floods also likely at isolated places.
- Very/extremely intense rainfall can produce flash flooding, inundation in low lying areas, mountains and steep hills produce rapid runoff, which can cause streams to rise quickly at isolated places.
- Isolated instances of damage to the vulnerable structures like Kutcha houses/roads/walls, huts and under-construction buildings, bridges, tunnels etc.
- Difficult driving conditions due to slippery roads and low visibility due to fog/low clouds leading to moderately increased travel time.
- Moderate damage to horticulture crop, plantation and Kharif crops like rice, maize, millet, beans, grams etc.
- Flight operations to/from airports may be disrupted. Helicopter operations to/from different helipads in the district may be affected.
- Railway operations may be affected.
- District headquarters, private & Government institutions, schools, hospitals, pilgrim places, tourist places may be affected by heavy rain.
- Damages to property/ human/ livestock at isolated places due to struck of lightning.
- Minor landslides at isolated places in vulnerable areas resulting in blocking/ washout of highways/ link roads.
- Overflow of rivulets and streams at isolated places in hills.

Impact based advisories (General):

- People residing in vulnerable areas prone to landslides are to remain alert.
- Pilgrims/tourists travelling to Chardham or other locations to remain alert and travel only if necessary. During continuous / heavy rains keep a watch on steep slopes while travelling.
- Settlements/People residing near major rivers and their tributaries; rivulets/streams and low-lying areas and flood plains are to remain alert.
- Dam/barrage management/ Hydroelectric power plants management/control authorities are

advised to take necessary precautionary measures.

- Mountaineering expeditions may be halted and the expedition members are advised to move to the safe places.
- Commuters or people travelling with vehicle need to be alert and travel only if necessary.
- Stay indoors during heavy rains/ flash flood. Do not try to cross an active landslide area.
- Monitor media reports for updates. Listen up for weather forecasts on local media. Keep an eye on social media
- Avoid visiting fragile hilly terrain and steep slopes.
- Don't try to walk through a flooded area. Avoid flooded areas if you are in a vehicle.
- Do not go swimming or boating in swollen rivulets, streams, rivers and their tributaries during heavy rains.
- Military and Para-military establishments/posts in remote/far-flung areas vulnerable to landslide, flash-flood are to remain alert.
- Construction activities of houses, building, bridges, dam, tunnels etc. may be halted during heavy rainfall period.
- Farmers are advised to make necessary arrangements for drainage of excess water from the fields. The harvested produce may be kept in safe & dry place.
- State government authorities are advised to take all necessary precautionary measures for smooth movement of people.
- Keep the harvested produce (if in the field) at safe place.
- Stay indoors; keep windows & doors closed during thunderstorm / lightning.
- Keep away from all the objects that conduct electricity during thunderstorm / lightning.
- Do not tie the animals in outdoor during thunderstorm / lightning / gusty winds.
- People are advised to be cautious and take shelter in safe places / Pucca houses during thunderstorm / lightning / gusty wind activities; do not take shelter under trees and park vehicles at safe places / sheltered parking.
- People residing in vulnerable areas prone to landslides are to remain cautious.
- Settlements/People residing near the rivulets/streams are to remain cautious.
- Farmers are advised to make proper drainage channel in the field to avoid water logging.

Impact based advisories (Agriculture)

- Farmer brothers are advised not to do irrigation and chemical applications during this period.
- The harvested produce should be stored well and seedlings can be protected using nets.
- Facilitate good drainage system to remove excess water from crop fields and nursery.
- Start the planting work of new saplings of Agroforestry plants in fallow land or Forest lands and catchment areas of watershed.
- Use light trap/pheromone trap in crop field for pest control.

Summary of four days rainfall over the State (30th June, 2025 – 03rd July,2025)

	30-06-2025	01-07-2025	02-07-2025	03-07-2025
Uttarakhand	WS	SCT	FWS	WS

ISOL: Isolated *i.e.*, Rain at 1 or 2 places
FWS: Fairly Widespread *i.e.*, Rain at many places
WS: Widespread *i.e.*, Rain at most places

SCT: Scattered *i.e.*, Rain at a few places
DRY: No rain

Rainfall forecast for next 5 days

Agromet Advisories issued by different Agromet Field Units (AMFUs) of Uttarakhand

1. A.M.F.U-ROORKEE (Haridwar, plains of Dehradun and Pauri districts)

Crop	Crop Specific Advisory
RICE	Farmer brothers are advised to avoid irrigation in nursery seedlings. To prevent termite and white grub infestation, it is advisable to utilize finely decomposed farmyard manure (FYM) during field preparation for rice transplanting.
Horticulture	Horticulture Specific Advisory
MANGO	<ul style="list-style-type: none"> • In anticipation of heavy to very heavy rainfall, farmer brothers are advised to refrain from irrigating their mango orchard. • Due to the current weather conditions of cloudy skies, rainfall, and high humidity, it is advisable to inspect mango orchards for potential pest and disease attacks. These weather conditions create a favorable environment for the occurrence of pests and diseases in the orchards. • Fruit flies: The female adult fruit fly punctures the ripening mango fruit by penetrating its needle-like ovipositor and lays the

	eggs inside. Activity of the fruit flies on mango fruits is from the last week of May to the last week of July. • Control: Fix fruit fly traps @16 traps/acre and recharge the same if required.
TOMATO	Because of heavy rainfall likely to occur, farmer brothers are advised to make drainage channels to remove excess water from the field.
Live Stock	Live Stock Specific Advisory
COW	• Farmer brothers are advised to avoid grazing of animals in farms and avoid tying outside when thunderstorms and rainfall activities are forecasted. • Farmer brothers are advised to vaccinate animals to protect them from disease outbreaks such as Foot & Mouth Disease (FMD), Haemorrhagic Septicaemia (H.S.), and Black Quarter (B.Q.) that are likely to occur at the onset of the monsoon season.
Poultry	Poultry Specific Advisory
CHICKEN	<ol style="list-style-type: none"> 1. Avoid water stagnation near the poultry house and ensure proper drainage. 2. Provide an adequate amount of dry littering materials for the base of the poultry house. 3. Ensure a sufficient supply of pure drinking water for the birds within the shed. <ul style="list-style-type: none"> • Keep the surroundings clean and free from weeds to prevent the growth of mosquitoes and flies.

2. **A.M.F.U-PANTNAGAR** (Udham Singh Nagar and plains of Nainital districts)

UDHAM SINGH NAGAR

Crop	Crop Specific Advisory
Rice	Add 2% urea mixed in 0.5% Zn So ₄ to the nursery. Application of fertilizers should be done as 1/4 N and full P and K at the time of sowing . If cowdung is being used then apply it 15-20 days earlier and use 1/2 N (10-15 kg). Nursery of basmati and aromatic rice should be prepared. Nursery of paddy should be filled with 4-6 cm of water before plucking the seedlings. Plucking of seedlings should be done carefully followed by washing the roots and transplanting of seedlings should be done immediately. Transplanting of paddy should be done when 4-5 leaves were seen in the seedlings of paddy. This stage comes after 18 days in early maturing varieties and after 20-25 days in medium duration varieties of paddy. Irrigation should be given in the field before 15 days of puddling. Field should be filled with water before 10-12 hrs of puddling and ploughing should be done 2-3 times. Field should be leveled. Transplanting should be done after 10-15hrs of puddling. Weather is favourable for transplanting.
Maize	Sowing Cluster varieties of kharif maize such as Tarun, Naveen, Kiran, Navjot, Pratap Maize-1, Pusa Cluster 3 and 4 can be sown. The seed rate can be maintained at 18-20 kg/ha and sowing can be done at a distance of 60-75 cm under light rainfall conditions.
Maize	The mature spring maize should be harvested.
Soyabean	Sowing of the crop can be done under light rainfall.

Horticulture	Horticulture Specific Advisory
Pumpkin/Other cucurbits	Mottled leaves if observed in the plant, plant should be separated from others. The harvested produce should be stored well to avoid spoilage.
Ladyfinger	After rainfall there are chances of occurrence of sucking pest so regular monitoring is required. Destroy the plants with yellow veins and control the sucking pest using Cyantraniliprole 10.26 % OD. Harvest the mature crop and send for sale. Maintain moisture in the field.
Chilli	After rainfall, sucking insects become common in chilli so the chemical application is required to control these pests. Harvest the mature chilli and send immediately for sale.
Livestock	Live Stock Specific Advisory
Cow	Don't, leave the animals in open under thunderstorm/lightning and intense rainspell conditions. Provide proper shelter and don't let them get wet in the rains.
Buffalo	Don't, leave the animals in open under thunderstorm/lightning and intense rainspell conditions. Provide proper shelter and don't let them get wet in the rains.

NAINITAL

Crop	Crop Specific Advisory
Rice	The transplanting operation can be postponed under heavy rainfall days.
Pigeon pea/Red gram/Arhar	The regular weeding-hoeing operation in the field can be postponed.
Kidney beans/Green gram/Black gram	Sowing operation can be postponed.
Barnyard millet/Finger millet	The regular weeding-hoeing operations should be postponed.
Maize/Soyabean	Regular weeding-hoeing operations and other farming operations should be postponed.
Horticulture	Horticulture Specific Advisory
Tomato	Shadenets/polynets should be used to protect the mature crops and plants. The mature fruits should be harvested and sent for sale immediately.
French Bean	Harvest the ripened crop and process it for sale immediately.
Potato	The crop should be stored well after harvesting to avoid spoilage.
Peach/Plum	Proper protection should be provided to mature fruits using shadenets.
Livestock	LiveStock Specific Advisory
Cow	Don't, leave the animals in open under thunderstorm/lightning and intense rainspell conditions. Provide proper shelter and don't let them get wet in the rains.
Buffalo	Don't, leave the animals in open under thunderstorm/lightning and intense rainspell conditions. Provide proper shelter and don't let them get wet in the rains.

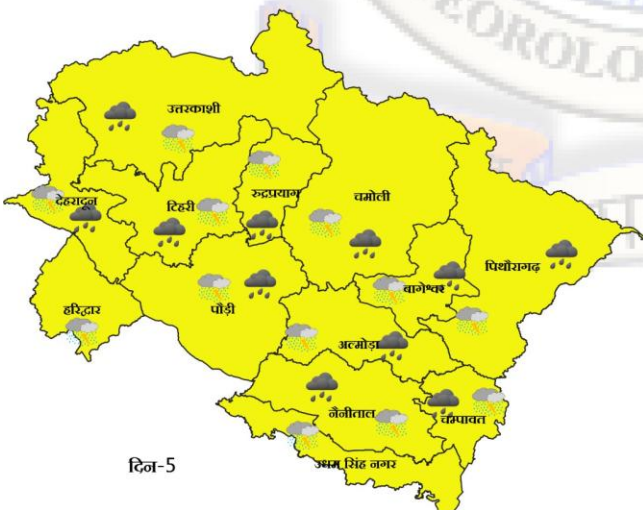

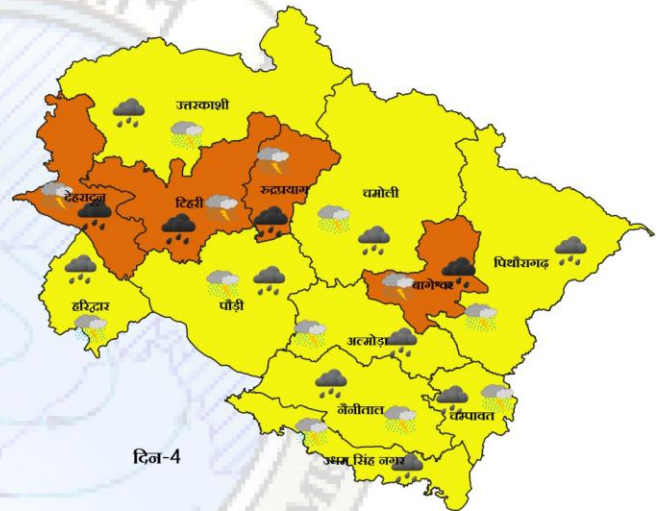

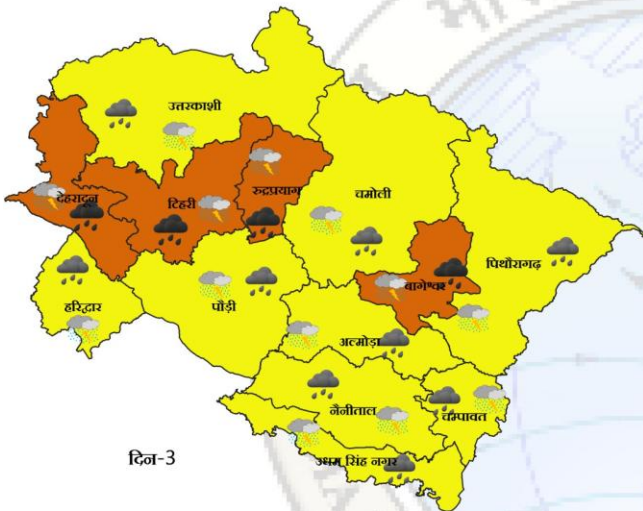

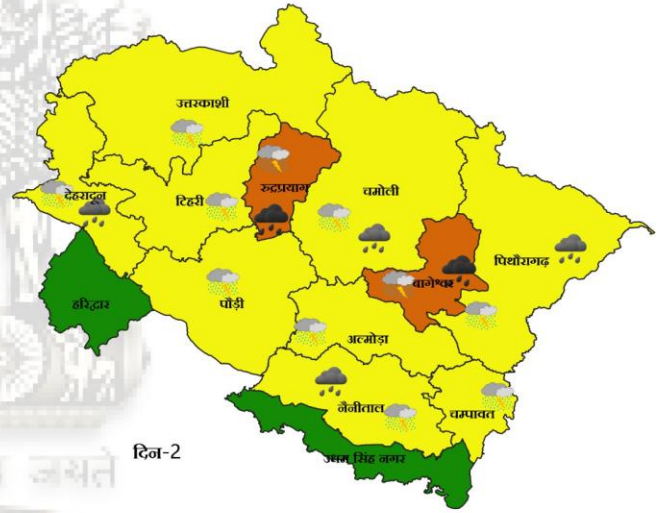

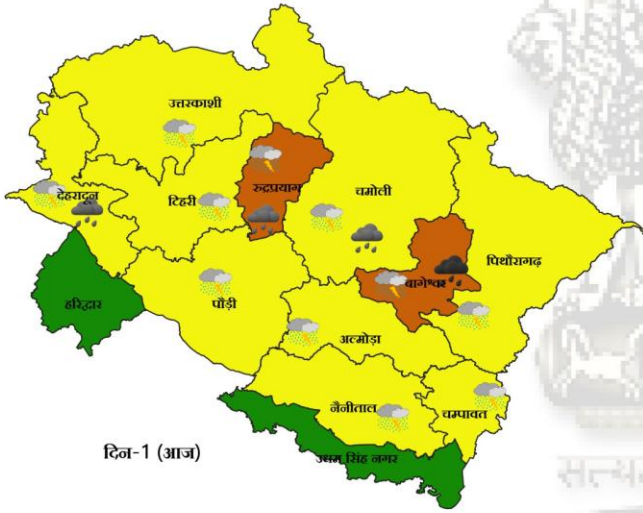

3. **A.M.F.U. RANICHAURI** (Hilly Region Of Uttarakhand)

CROP	Crop Specific Advisory
SOYABEAN	Weeding should be done. Maintain proper drainage in the crop field
RICE	Complete the transplanting. Strengthen the bunds in paddy fields.
MAIZE	Water logging inhibits the growth of maize plants. So, maintain proper drainage in maize crop.
TOMATO	Harvest of mature fruits. Avoid water logging. Staking should be done
APPLE	Plucking of ripened fruits of early varieties of apple. Cover fruit bearing plants by net to protect fruits by birds.
MULBERRY	It is suitable time for planting of mulberry saplings. Remove the weeds around older plants
LIVE STOCK	Live Stock Specific Advisory
COW	Give calcium rich diet to the milking animals. Keep hygiene around the animal shelter. Provide proper amount of green and dry fodder in the diet
GOAT	Maintenance of goats is not done properly in rain then may be pneumonia occurs. There is difficulty in breathing in pneumonia disease and this disease can be fatal. Contact a veterinarian if symptoms of pneumonia appear.
