Daily Weather Bulletin of Sikkim [Evening]

Summary of observation recorded at 0830 hours IST

SUMMARY OF OBSERVATION RECORDED AT 0830 HRS OF 13-11-2026:

Available data indicates that weather remained dry over the state Sikkim. Minimum temperature remained normal over most of the stations in Sikkim. Highest Maximum temperature 29.5°C was recorded at Mazitar (Pakyong) and lowest minimum temperature 9.5°C was recorded at Gangtok (AWS) ().

RAINFALL RECEIVED SO FAR IN CM RECORDED AT 0830 HRS OF 13-11-2026:

NIL.

SYNOPTIC SITUATION:

- The low pressure area over Southeast Bay of Bengal persists over the same region at 1430 hours IST of today, the 13th November, 2026. The associated cyclonic circulation extends upto 5.8 km above mean sea level. It is very likely to move northwestwards, become well marked low pressure area on 14th November and intensify into a depression over the same region around morning of 15th November, 2026. Thereafter, it is likely to move north-northwestwards and intensify further into a cyclonic storm over the central Bay of Bengal around 16th November evening.
- The east-west trough from the cyclonic circulation associated with the above Low-Pressure Area over Southeast Bay of Bengal to northern parts of Maldives across Southwest Bay of Bengal & adjoining equatorial Indian Ocean and extending upto 1.5 km above mean sea level persists.
- The upper air cyclonic circulation over Eastcentral Arabian Sea & adjoining northern parts of Lakshadweep at 3.1 km above mean sea level persists.
- The Western Disturbance as a trough in middle tropospheric westerlies with its axis at 5.8 km above mean sea level roughly along long 73°E to the north of Lat 32°N persists.

TEMPERATURE & FOG FORECAST:

No large change in day & night temperature during next 5 days. Occasional shallow fog at one or two places over the districts of Sikkim during next 2 days.
