Press Release for Wet spell in Himachal Pradesh

Weather Forecast and warning for Himachal Pradesh for next five days valid till 0830IST of 06th March, 2024.

- In view of active Western Disturbance, the state is very likely to experience precipitation (rain/snow) of moderate to heavy intensity in low, mid and high hill district of the Himachal Pradesh for next 48 hrs with peak intensity on 02nd March 2024. Moderate to heavy rainfall/snowfall over the state associated with isolated spells of heavy to very heavy precipitation (rain/snow) very likely to occur in the districts of Kangra, Kullu, Mandi, Chamba,, Kinnaur, Una , Shimla & Lahaul Spiti, during the period. The precipitation is likely to decrease significantly from 4th March 2024
- Aforesaid spell is likely to accompany with thunderstorm, lightning and gusty winds (Speed 40-50 kmph) at few places in plains/low hills and mid hills districts of the State with possibility of hailstorm at isolated places in the districts of Shimla, Solan, Kullu, Sirmaur, Chamba, Kangra, Una , Hamirpur and Bilaspur during this period.
- The average Minimum will be likely to normal to below normal and maximum temperatures will likely to be below normal during this period. Further updates follows.

Impact and Advisory

- Disruptions of essential services viz. water and electricity, communications and related services.
- Poor visibility conditions in the state creating difficulty to commute
- Disruption of traffic due to heavy snowfall in the high hills.

Actions Suggested

- Follow any traffic advisories that are issued in this regard.
- Follow the advisories and guidelines issued by the concerned departments.
- Check for traffic congestion on your route before leaving for your destination
- Avoid going in open areas in view of expected thunderstorms, lightning and gusty winds.
- People in snow bound areas to avoid venturing into sloppy and avalanche prone areas.
